General Summary for Tuesday, 21 October, 2025

British Mountain Summary:

Based on forecast chart for noon 21 October, 2025

Patchy rain drifts east across the Highlands, breaking up into showers. Staying showery all day toward west coast, locally more frequent rain. Showery rain throughout the day for England and Wales, occasionally heavy. Low cloud most persistent west. Increasingly windy, feeling cold.

Headline for Eryri / Snowdonia National Park

Windy, frequent showery rain, cloud covering tops.

Detailed Forecast for Tuesday, 21 October, 2025

How windy? (On the summits)	Westerly 25 to 30mph, at times 35mph higher northern mountains, squally gusts in showers to 40mph.
Effect of wind on you?	Affecting comfortable walking and balance on exposed tops and ridges. Considerable wind chill.
How wet? (Precipitation and its impact)	Rain on and off, occasionally heavy Showery rain will come and go all day, most common west coastal areas, merging into frequent rain locally over an hour or more, some heavier bursts.
Cloud on the hills?	High tops often in cloud Often covering higher terrain above 600-800m, lowest and most frequent western areas. Breaks at times higher up further east toward Berwyn and Bala.
Chance of cloud free summits?	20%
Sunshine? Air clarity (below cloud)	Largely cloudy, brief glimpses of sun mainly in east Wales. Visibility often poor over western hills in rain, very good at times inland/east.
How Cold? (at 900m)	6 or 7C, little change, small variation with height in morning; dropping to 4C into night. Feeling below freezing in the wind, near -5C on high tops.
Freezing Level	Above the summits

All mountain areas of Britain from Wednesday, 22 October, 2025

A complex weather situation through midweek, with various centres of low pressure drifting around slowly. Areas of rain and showers, but also drier moments - Wednesday and possibly Thursday often dry in eastern Scotland and northern England - beware of a deterioration from the northwest during Thursday with gales and rain setting in . Significantly colder later in the week as winds turn northerly. Freezing level dropping to 800-1000m into the weekend, lowest in northern Scotland. A mix of sunshine and showers falling as snow on high terrain , most frequent in north-facing areas.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
