All mountain areas of Britain from Friday, 21 November, 2025

Winter conditions over the mountains - snow coverage to lower slopes in Scotland, snow and ice cover varied for England & Wales, but much terrain frozen; hard frost into inland valleys and glens into Friday. A front moving into Scotland from the west on Friday brings gales and snow, turning to rain lower down - arriving in England & Wales Friday evening-night. Less cold into the weekend, but higher mountains stay near or just below freezing, particularly Scotland; showers or locally more frequent upland snow over several days forward. Later next week looks at least briefly milder.
