General Summary for Saturday, 29 November, 2025

British Mountain Summary:

Based on forecast chart for noon 29 November, 2025

Snow showers toward northern Scotland, but much of the Highlands will be dry - sunshine and cloud breaks best toward southwest; sub-zero on tops, chilly northerly breeze. England and Wales sees rain fairly widely, snow falling on higher tops; wind very variable, but risk gales developing.

Headline for Eryri / Snowdonia National Park

Rain and snow on tops becoming heavier, gales later.

Detailed Forecast for Saturday, 29 November, 2025

How windy? (On the summits) Effect of wind on you?	Beware of changing conditions as a complex weather system moves slowly: Westerly 20mph, or locally less for a few hours mainly inland. In afternoon shifting northerly, rapid increase to 40mph toward/soon after dusk. Likely fairly small for several hours, but be aware of rapidly worsening conditions late in the day, significant wind chill developing.
How wet? (Precipitation and its impact)	Increasingly wet, snow on tops Rain on and off at least from dawn into morning, but likely increasingly setting in for constant heavier falls north/west areas, particularly afternoon, falling as snow over higher terrain, by dusk to 700m, possibly 500m into evening.
Cloud on the hills? Chance of cloud free summits?	Extensive higher areas Hills shrouded by cloud most or all day, most extensive in constant rain/snow. Occasional breaks to 600-700m or above may form mainly inland and eastern hills. 20%
Sunshine? Air clarity (below cloud)	Overcast. Visibility mostly poor due to rain or increasingly very poor on the tops due to snow.
How Cold? (at 900m) Freezing Level	0C, dropping to -2C from dusk. Feeling like -10C, risk -15C if wind speed increases late in day. 900m, dropping into evening to 600-700m.

All mountain areas of Britain from Sunday, 30 November, 2025

After a lull on Sunday, areas of low pressure then circulating to the west and north will dominate the weather pattern into next week, bringing generally unsettled weather. Southwesterly air and briefly milder into Monday, with rain for most places at times, but prolonged heavier rain for England and Wales. Then typically cooler with showery conditions - higher mountains near or just below freezing point likely for the remainder of the week - some snow on tops, occasional hail. Wind speed likely to vary, some squally gusty spells, but also some lulls possible during the week ahead.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
