General Summary for Sunday, 30 November, 2025

British Mountain Summary:

Based on forecast chart for noon 30 November, 2025

A fine day for many places, sunshine and broken cloud. Much terrain frozen in the Highlands, where a lull in wind, later strengthening southerlies in west. Strong northwesterlies for England and Wales tend to drop. Some local showers move inland from the Irish Sea. Deteriorating all areas into night.

Headline for Eryri / Snowdonia National Park

Chilly breeze, gales into night. A few showers, some sun.

Detailed Forecast for Sunday, 30 November, 2025

How windy? (On the summits) Effect of wind on you?	Northwesterly 20-30mph up to dawn, soon easing westerly 15mph, then in afternoon southwesterly 20mph. Increasing into night southerly 50-65mph. Marked wind chill and blustery at first, soon lessening. Deteriorating into night.
How wet? (Precipitation and its impact)	Brief showers, flurries tops Wet underfoot, or icy on higher terrain with a dusting of fresh snow on some tops, mainly in northern areas. Occasional showers mostly near to west coasts, snow flurries above 800m.
Cloud on the hills? Chance of cloud free summits?	Most common higher western tops Cloud likely to often cap higher slopes in the morning, may come and go all day nearer to western coasts, but some breaks likely. Best clearer spells to tops further inland and eastwards. 50%
Sunshine? Air clarity (below cloud)	Variable cloud and patchy sun; high cloud builds later in day from west. Visibility excellent out of cloud.
How Cold? (at 900m) Freezing Level	0 or -1C, then rising after dark, reaching 5C by middle of night. Feeling like -8C if exposed to wind early morning. 800 to 900m; lifting above tops later evening into night.

All mountain areas of Britain from Monday, 1 December, 2025

Areas of low pressure circulating to the west and north will dominate the weather pattern in the week ahead, bringing generally unsettled weather. Southwesterly air and briefly milder into Monday, with rain for most places at times, but prolonged heavier rain for England and Wales. Then typically cooler with showery conditions - higher mountains near or just below freezing point likely for the remainder of the week - some snow on tops, occasional hail. Wind speed likely to vary, some squally gusty spells, but also some lulls possible during the week.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
