Headline for Eryri / Snowdonia National Park

Stormy winds, heavy rain then showery.

Detailed Forecast for Tuesday, 9 December, 2025

How windy? (On the summits) Effect of wind on you?	South later southwesterly, strengthening from overnight to 50-60mph before dawn, reaching 70mph with gusts 80mph+ over higher mountains in west, peak speeds likely middle of day into early afternoon, then slight lessening. Difficult mobility and significant chill factor across exposed terrain all day, the most severe conditions into middle of day, powerful gusts could knock you over even on some downslopes.
How wet? (Precipitation and its impact)	Early heavy rain then showers, flooding Incessant heavy rain from overnight lingers after dawn. Rain breaks into showery bursts through morning, mostly west, some broader areas of rain returning. Beware fast-flowing streams and local floods.
Cloud on the hills? Chance of cloud free summits?	Extensive, local improvements later Blanket cloud from middle or lower slopes up through the morning, always lowest on western slopes. Breaks to middle slopes occurring afternoon, chance of breaks up to 700-800m Carneddau/east Wales. Less than 10%, 20% east Wales later
Sunshine? Air clarity (below cloud)	Overcast and dull, some bursts of sun may come through in afternoon, mainly north/eastern hills. Poor visibility, may improve where rain fades, but staying hazy.
How Cold? (at 900m) Freezing Level	9 or 10C, sharply dropping afternoon towards 4C by nightfall. Feeling as cold as -10C in the wind. Above the summits

All mountain areas of Britain from Wednesday, 10 December, 2025

A very unsettled pattern as southwesterly winds prevail and low pressure systems move in from the Atlantic, sustained gales over the mountains, severe or stormy for periods. Temperatures only close to freezing on higher Scottish tops this week, even here will experience spells above freezing with thawing, leaving snow increasingly patchy, but beware some icy surfaces on the very highest tops where some refreezing occurs. Drier for most places on Thursday this week, otherwise rainfall will be frequent and heavy, sometimes showery with hail. Expect wet ground conditions and further flooding of streams and some rivers.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
