## General Summary for Saturday, 14 February, 2026

### British Mountain Summary:

#### Based on forecast chart for noon 14 February, 2026

A transient ridge of high pressure will bring a cold but mostly sunny day although a few snow flurries on some western hills. Nearly all terrain frozen. Toward dusk, initially near the west coast the wind will increase quickly - ahead of severe upland gales and snow overnight.

### Headline for Eryri / Snowdonia National Park

Terrain mostly frozen. Light wind; extensive sun.

## Detailed Forecast for Saturday, 14 February, 2026

<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	Northwest or northerly 15 or 20mph at dawn. Will drop through morning to or below 10mph in a prolonged lull. Strengthening toward dusk: southerly 20 to 30mph.  <b>Small or negligible but very difficult conditions quickly developing after dark.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Precipitation very unlikely</b> A few light snow showers or flurries northern hills (most likely Carneddau) in morning; otherwise dry.
<b>Cloud on the hills?</b>   <b>Chance of cloud free summits?</b>	<b>Very little</b> Mountains extensively cloud free. Chance patches coming and going Carneddau morning and on western mountains above 500 to 750m afternoon.  <b>90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Extensive bright sunshine before high level cloud spreads eastward afternoon. Patchy cloud morning Carneddau Excellent or superb visibility.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	-3C.  Terrain largely frozen from valleys up. Through day freezing level rising from 400 to 600 or 700m, highest sunlit slopes and toward west coast.

## Eryri / Snowdonia National Park - Looking Ahead

	Sunday 15 February	Monday 16 February
<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	Westerly 30 to sometimes 35mph. May strengthen toward 40mph middle of day or afternoon.  <b>Significant wind chill and widely arduous walking on higher areas. Most gusty near showers when balance sometimes difficult.</b>	Westerly in the range 25 to 40mph.  <b>Likely to impede ease of walking and risk strong enough to make walking difficult and wind chill significant.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Showery; sometimes frequent</b> Persistent snow clearing before dawn. Through day hail and snow showers - but over 2 or 3 hours the precipitation may be frequent or almost constant. Mostly rain below 800m.	<b>Snow showers; sometimes frequent</b> Snow and hail showers, sometimes frequent and threat of the precipitation almost constant over a couple of hours. Mostly rain below 450m.
<b>Cloud on the hills?</b>          <b>Chance of cloud free summits?</b>	<b>Frequently or persistently covering higher summits.</b>  Fog across the hills at dawn in precipitation. Will soon improve markedly as cloud base rises to 550-750m, albeit dropping again to or below 400m in rain. Generally highest cloud base will be in east Wales.  <b>30%</b>	<b>Extensive</b>  Cloud base varying, between 300m near precipitation and otherwise 500 to occasionally above 750m (generally highest base east Wales).  <b>20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Bursts of sunshine, mainly east Wales. Sometimes excellent visibility, but abruptly poor in precipitation.	Occasional sunshine - mainly lower slopes east Wales. Very varied visibility; very poor or appalling in snow, but otherwise excellent.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	Soon 2C. Will feel as close to minus 10C where exposed to the wind.  Most terrain frozen, albeit freezing level soon 1000m or above with thaw commencing.	0 or -1C. Will feel around minus 14C directly in the wind.  800m to 950m.

## Planning Outlook

## All mountain areas of Britain from Sunday, 15 February, 2026

Persistent cold most mountain areas, particularly across Scotland next week. Further snow from time to time. England and particularly Wales will have intermittently higher freezing levels resulting in freeze-thaw cycles.

## Forecast issued at 12:24 on Friday, 13 February, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
