General Summary for Sunday, 15 March, 2026

British Mountain Summary:
Based on forecast chart for noon 15 March, 2026

Widespread rain - snow higher areas Scotland and finishing as snow higher summits elsewhere, will from the west clear (as temperatures drop) to squally hail and snow showers. Upland winds will be close to gale force, and although improving, still extensive low cloud.

Headline for Eryri / Snowdonia National Park

Upland wind near gale; rain, snow and fog.

Detailed Forecast for Sunday, 15 March, 2026

<p>How windy? (On the summits)</p> <p>Effect of wind on you?</p>	<p>Southwest 50 to occasionally 60mph on higher tops until later morning. Then veering westerly, a slight lull, then 35 to on higher tops 40-45mph - very gusty near precipitation.</p> <p>Continued difficult walking and wind chill significant on exposed higher areas. Expect balance, and in places general mobility to be difficult.</p>
<p>How wet? (Precipitation and its impact)</p>	<p>Rain morning; clearing to showers</p> <p>Morning: Extensive rain, though mostly light easternmost summits. Middle of day: Clearing from west, but the rain finishing as snow above 700m Afternoon: Rain, hail and above 700 snow showers.</p>
<p>Cloud on the hills?</p> <p>Chance of cloud free summits?</p>	<p>Hills covered morning; then cloud base rising markedly</p> <p>Morning: Blanket of fog across the hills, breaks to 700m west Wales. Middle of day: Beginning to improve. Into afternoon: Varying cloud base, between 500m near precipitation and mostly 750 to 900m.</p> <p>Less than 10% morning; later 40%</p>
<p>Sunshine? Air clarity (below cloud)</p>	<p>Dull and misty morning. Then improving to patchy sun (mainly east Wales) and mostly very good visibility (temporarily poor in precipitation).</p>
<p>How Cold? (at 900m)</p> <p>Freezing Level</p>	<p>4C dropping to 0C. Will feel as cold as minus 12C where exposed to the wind.</p> <p>Above the summits morning, then dropping erratically to 900m.</p>

Eryri / Snowdonia National Park - Looking Ahead

	Monday 16 March	Tuesday 17 March
How windy? (On the summits) Effect of wind on you?	Westerly; easing from 40-45 to 30-35mph through morning. Strengthening again toward dusk. Significant wind chill and arduous or at times difficult walking. Balance may well be a struggle at least in morning.	Southerly 30 to 45mph, strongest Snowdon to Carneddau, least wind toward Berwyn Mountains. Considerable wind chill and in near gales; walking sometimes difficult. Balance a struggle.
How wet? (Precipitation and its impact)	Rain & drizzle increasingly widespread. Possibly dry most of morning but perhaps a few showers, of snow above 450m at first, before rain and drizzle spreads east (temporarily snow higher areas). The rain persistent western mountains, but patchy east Wales.	Risk drizzle Snowdon-Lleyn peninsula Frequently dry, but risk frequent or constant drizzle Lleyn peninsula to Snowdon.
Cloud on the hills? Chance of cloud free summits?	May clear to higher slopes temporarily - then considerable deterioration. Generally fog higher areas all day, in the afternoon widely below 300-400m westernmost slopes to 500-700m east Wales. Perhaps a period later morning when most cloud above 800m (especially east Wales) later morning/middle of day. 20%	Risk blanket of fog Snowdon range Snowdon to Lleyn peninsula: Persistent fog, cloud base 300m, perhaps lower, to 550m. Elsewhere: Cloud covering the hills widely, but may well mostly or completely break up later morning or middle of day. 10% Snowdon range; otherwise 50%
Sunshine? Air clarity (below cloud)	Glimpses of sun temporarily before cloud thickens: becoming dull and misty.	Snowdon-Lleyn peninsula: Threat dull and murky most or all day. Elsewhere: Pockets of sun, perhaps becoming widespread; visibility good although a haze.
How Cold? (at 900m) Freezing Level	-1C, rising to 0C morning; later 3 or 4C. Will feel as cold as minus 15C due to wind chill. 750m morning, but rising slowly. Abruptly above the summits later in day.	4C. Above the summits

Planning Outlook

All mountain areas of Britain from Monday, 16 March, 2026

An abrupt transition will take place on Tuesday and Wednesday. Areas of low cloud, drizzly rain and strong winds will continue to affect mainly western mountains until Wednesday. But then as pressure builds north of Britain it will become extensively fine; cloud often clearing, particularly western Britain, and temperature levels more varied - fairly warm some afternoons but frost widely at night.

Forecast issued at 12:29 on Saturday, 14 March, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
