## General Summary for Tuesday, 31 March, 2026

### British Mountain Summary:

**Based on forecast chart for noon 31 March, 2026**

A foggy, drizzly start for most, fog to lower slopes in western coastal areas. Fog lifts with time and drizzly rain eases, bursts of sun breaking out east, and perhaps more widely afternoon. Fog and drizzle lingers longest west Scotland and south Pennines. Blustery early, easing for most; a mild feel in England and Wales.

### Headline for Eryri / Snowdonia National Park

Breezy and drizzly early, improving, best east with sun breaks

## Detailed Forecast for Tuesday, 31 March, 2026

<b>How windy? (On the summits)</b>	Northwesterly, 25-30mph at dawn, likely gusty too, up to 35mph over high tops and passes. An easing trend and shifting westerly with time, settling near 15-20mph.
<b>Effect of wind on you?</b>	<b>Fairly small most of the day, but balance affected on exposed ridges in stronger speeds and gusts in the morning; feeling quite chilly in the morning despite milder air.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Drizzly rain, fading during day, driest east</b> Drizzle and light rain most persistent and widespread during the morning on the high mountain groups nearest to coasts. Tending to fade, but patchy drizzle may linger near west coast, feeling generally damp where within cloud, making rock surfaces slippery.
<b>Cloud on the hills?</b>	<b>Extensive, then rising and breaking</b> Blanket low cloud across the hills in the morning, from lower elevations up in west, 400-500m inland. Tending to rise to 600-700m, breaks gradually forming, but banks likely come and go on high western tops, only fleeting breaks off highest tops.
<b>Chance of cloud free summits?</b>	<b>Below 10%, rising to 40% afternoon.</b>
<b>Sunshine? Air clarity (below cloud)</b>	Cloudy and misty early, brighter moments emerge with time inland, perhaps more widely afternoon, visibility becoming good where cloud lifts and breaks.
<b>How Cold? (at 900m)</b>	5 or 6C. Feeling like -3 to -5C directly in the wind, particularly in the morning.
<b>Freezing Level</b>	Above the summits.

## Eryri / Snowdonia National Park - Looking Ahead

	Wednesday 1 April	Thursday 2 April
<b>How windy? (On the summits)</b>	West to southwesterly 15 to 25mph, may strengthen with time from north.	West-northwesterly 15-20mph.
<b>Effect of wind on you?</b>	<b>Fairly small, but may start to feel more noticeable and gusts affecting balance on exposed ridges.</b>	<b>Fairly small</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Little if any rain until late</b> Chance of odd drizzly showers. Later in the day, greater risk of patchy rain developing from the northwest.	<b>Substantially dry</b> A chance of spotty drizzly rain here and there, most likely north and west slopes, but most areas entirely dry.
<b>Cloud on the hills?</b>	<b>Covering higher slopes most often west</b> Cloud banks over higher tops, most frequent or persistent toward Cardigan Bay above 600-800m. Mostly above 800m by mid-morning near and east of A5 corridor.	<b>Rising to just high terrain, summit breaks</b> In the morning, most cloud Snowdon group to Carneddau, 700m and up, a risk more extensive around dawn. Fog lifts to mostly just summits, may only briefly clear above 900m highest summits as well as western slopes.
<b>Chance of cloud free summits?</b>	<b>30%</b>	<b>50%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Patchy sunshine breaking out here and there, perhaps more frequently for a time afternoon. Visibility good below cloud.	Often or mostly sunny. Excellent visibility.
<b>How Cold? (at 900m)</b>	4C, may rise a degree. Feeling nearer -4C if exposed to wind.	-1C, lifting to 0C.
<b>Freezing Level</b>	Above the summits.	600-700m, lifting towards 800-900m.

**Planning Outlook****All mountain areas of Britain from Wednesday, 1 April, 2026**

A drop of temperature is expected across Scotland during Wednesday as a band of rain drifts slowly southwards, turning to heavy upland snow. Atlantic weather patterns and west-southwesterly winds follow behind into the start of the Easter period at least, but day-to-day detail is uncertain. Temperature and wind will be variable, periods of gales and possibly often cold over the mountains with snow and hail showers at times to lower elevations at least in Scotland, sometimes more widely, mixed with some spells of rain - precipitation generally most frequent west and northwest, though bands of heavy rain will sweep east at times. Some windows of drier and brighter conditions, as well as milder days in England and Wales, occasionally milder Scotland too.

**Forecast issued at 15:51 on Monday, 30 March, 2026**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
