General Summary for Sunday, 19 April, 2026

British Mountain Summary: Based on forecast chart for noon 19 April, 2026

Fine conditions for many places with patchy cloud and sun. A chilly breeze will be strongest in northern Scotland. Brief showers with snow flurries on hills in northwest Scotland in the morning. Well scattered mostly light showers across Scotland and northern England into afternoon and early evening.

Headline for Eryri / Snowdonia National Park

Light wind, sunshine and broken cloud.

Detailed Forecast for Sunday, 19 April, 2026

How windy? (On the summits)	Northerly 10 to 15mph, at times less.
Effect of wind on you?	Generally small, but feeling chilly especially in the morning if exposed on tops.
How wet? (Precipitation and its impact)	Any precipitation unlikely
Cloud on the hills?	Mostly northern tops in morning Patchy cloud mostly on northern slopes early morning, plus local mist some valleys at dawn. Patchy banks may linger on middle and upper slopes to the north for a time, but dissipating for cloud-free summits by afternoon.
Chance of cloud free summits?	50% north at dawn, rising to 80%
Sunshine? Air clarity (below cloud)	Mostly sunny, some thin high cloud around, and some fair weather cloud building afternoon. Excellent visibility.
How Cold? (at 900m)	1C from dawn, rising to 3 to 5C, mildest mid-Wales afternoon.
Freezing Level	Above the summits.

Eryri / Snowdonia National Park - Looking Ahead

	Monday 20 April	Tuesday 21 April
How windy? (On the summits) Effect of wind on you?	Easterly, 15mph, some gusty areas. Small effect on walking, but feeling rather chilly on exposed high tops.	Easterly 25 to 35mph, very gusty in places around higher tops, through passes and locally downslope to west. Considerable wind chill in exposure, blustery spots may affect balance and make walking uncomfortable.
How wet? (Precipitation and its impact)	Scattered showers A few brief showers mainly toward north coastal areas in the morning, possible soft hail or a flurry of snow on higher slopes. Then a scattering of brief showers more widely afternoon, but locally often dry.	A little rain Patchy light rain or brief light showers, mostly east Wales.
Cloud on the hills?	Capping some tops in morning, lifting Patchy cloud banks mostly capping Carneddau above 700m in morning, occasionally drifting over higher Snowdon group for a time. Lifting higher up, leaving most cloud above hills afternoon.	Varied then mostly lifting Cloud banks above 600-700m, mostly areas from Carneddau to Berwyn and Bala in morning, more broken in west. Tending to lift higher and may gradually break up.
Chance of cloud free summits?	60% rising to 90%	60%
Sunshine? Air clarity (below cloud)	Patchwork of cloud and sun; best near west coast in the morning. Visibility often excellent, briefly reduced in showers.	Fairly cloudy, some brighter sunnier moments mostly west coastal areas. Visibility very good.
How Cold? (at 900m) Freezing Level	0C rising to 3C afternoon. Where exposed to wind, feeling like -5C early in day, later -2C. Slight frost in valleys and close to freezing on highest tops above 900m from dawn. Rising above freezing to all tops.	1C rising to 3C afternoon. Directly in the wind, feeling like -7 to -10C. Near to freezing on highest summits in morning, then further above all tops.

Planning Outlook

All mountain areas of Britain from Monday, 20 April, 2026

A cool northeasterly wind into Monday brings a scattering of showers, but plenty of dry weather too. High pressure stays nearby to the north of Britain through the week ahead giving a run of dry days with sunshine typically best in the west, but many mountains often free of low cloud. A cool easterly wind prevails for England and Wales, strongest toward the south, whilst Scotland has often lighter winds. Some overnight frosts. Daytime temperatures near average, typically a few degrees above freezing on high tops through midweek. Dry, settled conditions are likely to continue into next week.

Forecast issued at 16:00 on Saturday, 18 April, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
