General Summary for Saturday, 23 May, 2026

British Mountain Summary:

Based on forecast chart for noon 23 May, 2026

Scotland: Gusty south-westerly will feed extensive low cloud and patchy drizzle into the west. Mostly dry for eastern hills where cloud will lift and break off the hills.

England and Wales: Low cloud and local drizzle morning western hills, mainly coasts, but burning off to leave warm sunshine widely.

Headline for Eryri / Snowdonia National Park

Early low cloud or mist disperses. Then sunny and increasingly warm. Light winds.

Detailed Forecast for Saturday, 23 May, 2026

| | |
|---|--|
| How windy? (On the summits) | West-southwesterly 10-15mph, some variability and occasional stronger gusts. |
| Effect of wind on you? | Fairly small but nuisance gusts much of the day over tops and elevated passes. |
| How wet? (Precipitation and its impact) | Likely dry Chance of some early fine drizzle over Yr Wyddfa/Snowdon, perhaps some high western aspects further south, this fading through morning for dry hills. |
| Cloud on the hills? | Early low cloud west, most hills clearing Low fog on western slopes at dawn, largely below 700m (chance high tops above a layer of cloud, but uncertain). Cloud rises and breaks, hills mostly clear by afternoon, perhaps odd banks west slopes at times. East Wales/Carneddau sees little cloud all day. |
| Chance of cloud free summits? | Rising to 80% |
| Sunshine? Air clarity (below cloud) | Mostly sunny, some patchy higher cloud at times. Very good visibility. |
| How Cold? (at 900m) | 10C rising to 13C (to a warm 22C east valleys). Staying elevated into night; little change with height. |
| Freezing Level | Above the summits. |

Eryri / Snowdonia National Park - Looking Ahead

| | Sunday 24 May | Monday 25 May |
|---|--|--|
| How windy? (On the summits) | South to south-westerly 10 to 15mph | South to south-westerly 10mph. |
| Effect of wind on you? | Mostly negligible | Small |
| How wet? (Precipitation and its impact) | Dry | Dry |
| Cloud on the hills? | Mountains clear Aside from some patches of banks across coastal hills early in morning, which will burn off, hills are expected to be clear. | Mountains clear Any early mist will soon disperse to leave the mountains clear. |
| Chance of cloud free summits? | 90% | 90% |
| Sunshine? Air clarity (below cloud) | Extensive sunshine coming through. Very good visibility. | Widespread and strong sunshine. Good visibility, but slight haze. |
| How Cold? (at 900m) | 12C lifting to 16C, warm | 18C, humid |
| Freezing Level | Well above the summits | Well above the summits. Valley temperatures inland reaching high 20s. Cooling sea breezes for coastal hills. |

Planning Outlook**All mountain areas of Britain from Sunday, 24 May, 2026**

Pressure builds this weekend, centred over England and Wales where it will be warm and sunny. To the north of the high, a blustery and gusty south-westerly will persist across the Highlands with patchy rain and hill fog, mainly in the west and northwest. Very warm by Sunday and Monday valleys of Wales and England, mid to high 20s. Low 20s glens into southern and eastern Scotland. Next week, high pressure extends over Scotland, cutting of the low cloud and drizzle from northwest Scotland by midweek with warm sunny weather, cooler in the north and east coast. Still very warm into the valleys of England and Wales with extensive sunshine.
