General Summary for Tuesday, 2 June, 2026

British Mountain Summary:
Based on forecast chart for noon 2 June, 2026

Heavy showery bursts of rain with thunder and lightning, moving eastwards over England, Wales and south-central Scotland. A zone of more persistent rain affects the Cairngorms, heavy bursts mixed in. Drier toward west coast of Scotland, improving in western England & Wales in afternoon as the breeze freshens.

Headline for Eryri / Snowdonia National Park

Breezy, showery bursts clear eastward, chance thunder.

Detailed Forecast for Tuesday, 2 June, 2026

How windy? (On the summits)	Westerly 20 to 25mph, freshening during day, at times 30mph afternoon.
Effect of wind on you?	Noticeable breeze, at times starting to affect balance on exposed ridges. Feeling rather cool in exposure on tops.
How wet? (Precipitation and its impact)	Heavy thundery showers clear Showery rain on and off from dawn, some heavier bursts forming and passing eastwards morning into middle of day, risk isolated thunder. Fading for a time in west afternoon, some light showers later. Wet underfoot and fast-flowing streams after previous rain.
Cloud on the hills?	Lifting toward tops, breaks form Cloud banks covering higher slopes most widely in west in morning, becoming confined above 800m and higher breaks into middle of day onward. Patches likely return over western tops into evening.
Chance of cloud free summits?	50%
Sunshine? Air clarity (below cloud)	Glimpses of sun, becoming sunnier near west coast for a time afternoon. Visibility very good, reduced in showers.
How Cold? (at 900m)	8 or 9C. Feeling close to 0C if exposed to wind.
Freezing Level	Above the summits.

Eryri / Snowdonia National Park - Looking Ahead

	Wednesday 3 June	Thursday 4 June
How windy? (On the summits) Effect of wind on you?	South-southwesterly 40 to 50mph, up to 60mph for periods at least in gusts on higher tops. Strenuous to often arduous walking in exposure, powerful gusts could knock you over. Considerable wind chill.	Southwest soon westerly, 30 to 40mph, speeds may vary, stronger gusts occasionally. Strenuous walking conditions, frequent buffeting affecting balance on exposed high terrain. Marked wind chill.
How wet? (Precipitation and its impact)	Heavy rain, drizzle, then showery Rain extends in from west early in day, soon fairly persistent, heavy for a time especially west, drizzly even when heavier rain fades, drier moments northeast. Showery bursts afternoon-evening. Chance isolated thunder.	Bursts of rain on and off, risk lightning Showery rain throughout the day, some heavy bursts increasingly extend eastwards, risk of thunder. Coastal areas may become drier for a time afternoon, but further showery rain likely later.
Cloud on the hills?	Extensive Blanket low cloud across the hills, from lower slopes up near the coast, rarely above 500-600m inland, highest bases toward northeast of Ogwen valley. Base rising afternoon, but rarely above tops, ragged patches lower again in showers.	Fairly extensive, varied Covering higher slopes frequently, more persistently in western areas, ragged patches to lower slopes during and after rain; tending to lift higher afternoon with some breaks.
Chance of cloud free summits?	10%	30%
Sunshine? Air clarity (below cloud)	Largely cloudy, dull, murky toward west in rain; hazy at best. Better visibility eastern hills below cloud, more widely in drier moments afternoon.	Rare brief sun, may break through in west for a time afternoon. Visibility occasionally good below cloud, but reduced in rain, at times poor.
How Cold? (at 900m) Freezing Level	7C, slight rise mainly in east. Wind chill feeling like -5 to -8C. Above the summits.	6 or 7C, then tending to drop into night. Feeling near -5C directly in the wind. Above the summits.

Planning Outlook

All mountain areas of Britain from Wednesday, 3 June, 2026

An unsettled spell this week and next, as low pressure over the north Atlantic and west-southwesterly winds dominate. Periods of rain mixed with showery days widely - the most constant rain over western mountains with low cloud often shrouding the hills. Wind speed will vary, but up to gale-force for periods over the hills this week, then typically less windy next week. Temperatures near average, cooler at times. Briefly higher pressure by Saturday with fewer showers, but a further area of rain likely returns from the west during Sunday. Mid June onward shows signs of drier and warmer weather as higher pressure then expands northward with time.
