General Summary for Monday, 8 June, 2026

British Mountain Summary:

Based on forecast chart for noon 8 June, 2026

Early rain across England and Wales, and perhaps eastern Scotland, soon clears eastwards. Following on, a south-westerly with scattered showers: risk of afternoon thundery ones northeast Scotland. Fewer showers and turning much brighter for England and Wales with hills becoming mostly clear.

Headline for Eryri / Snowdonia National Park

Early rain clears, then much brighter with patchy sun, and isolated showers.

Detailed Forecast for Monday, 8 June, 2026

How windy? (On the summits)	South-westerly soon veering westerly 15 to 25mph, perhaps briefly 35mph for a time east Wales early on.
Effect of wind on you?	Mostly small effect on walking, but feeling blustery and a noticeable chill on exposed high terrain.
How wet? (Precipitation and its impact)	Any early rain clears, then isolated showers. A band of rain clears eastward around dawn, briefly heavy. Then a lot of dry weather follows for the day, with just isolated passing showers, but likely more frequent in the evening.
Cloud on the hills?	Fairly extensive at first, but lifting to or above tops. Fairly extensive from dawn in early rain, banks down to 400-600m. Bases lifting and breaking as rain clears, to leave veiled cloud patches over western tops above 800m, but breaks to tops. Hills clear completely, following rain, north and east Carneddau to Bala.
Chance of cloud free summits?	30% lifting to 80%
Sunshine? Air clarity (below cloud)	Brightening up with a mix of cloud and patchy sunshine. Visibility very good away from showers and below cloud.
How Cold? (at 900m)	4 or 5C. Feeling below freezing directly in the wind.
Freezing Level	Above the summits.

Eryri / Snowdonia National Park - Looking Ahead

	Tuesday 9 June	Wednesday 10 June
How windy? (On the summits) Effect of wind on you?	West to south-westerly 20 to 30mph, lifting to 35 to perhaps 40mph at times across the tops. Be prepared for very blustery conditions and a cold feel for the time of the year. Perhaps fairly arduous tops at times.	Westerly 15 to 25mph Mostly small, but marked wind chill where exposed to the strongest breeze.
How wet? (Precipitation and its impact)	Frequent showers Frequent precipitation through the day, in the form of shower after shower feeding in across the hills. Some hail mixed in with the risk of thunder inland.	Showers extending across area Showers, initially toward west coast, will move inland hour by hour and develop more widely. By afternoon, widespread showers, risk thunder east Wales.
Cloud on the hills?	Frequently covering upper slopes Fairly extensive above 500-700m at first, but bases rising to become mostly around 700-900m afternoon, perhaps some breaks to tops, mainly well inland.	Often covering tops Varying, but tops often covered through the day, especially towards west coast in the morning. Breaks to tops best in afternoon, outwith showers.
Chance of cloud free summits?	30%	30%
Sunshine? Air clarity (below cloud)	Often cloudy, patchy sun best in the east. Visibility often poor due to rain.	Variable cloud and patchy sun, best sun early in day well inland. Visibility mostly good, but poor in showers.
How Cold? (at 900m) Freezing Level	3C lifting to 5C Above the summits	3C lifting to 5C Above the summits

Planning Outlook**All mountain areas of Britain from Tuesday, 9 June, 2026**

The unsettled period of weather will persist over the coming week with low pressure area centres tracking just to the northwest of Scotland, allowing south-westerly winds to prevail. Rainfall often showery in nature, but coming in frequently to western mountains with the greatest falls for western Scotland. Chilly and windy at times; freezing level touching highest tops Scotland on Tuesday and Wednesday, when showers may fall as wet snow at times over the tops. Temperatures trending warmer again next weekend, as pressure is likely to rise from the south to give drier weather more widely.

Forecast issued at 16:26 on Sunday, 7 June, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
