General Summary for Sunday, 2 August, 2026

British Mountain Summary:

Based on forecast chart for noon 2 August, 2026

A temporary ridge of high pressure will bring a fine day with light wind almost everywhere. Cloud will be above nearly all summits and the air will be very clear. Nevertheless a few showers at first NW Scotland and later cloud thickening many areas ahead of rain.

Headline for Eryri / Snowdonia National Park

Light wind; very clear air; sunshine gradually weakening.

Detailed Forecast for Sunday, 2 August, 2026

How windy? (On the summits)	Generally easterly 10mph. Toward evening will begin to strengthen, perhaps 20mph by dusk.
Effect of wind on you?	Negligible.
How wet? (Precipitation and its impact)	Rain very unlikely Risk of a burst of rain from about dusk.
Cloud on the hills?	Not expected
Chance of cloud free summits?	Almost certain
Sunshine? Air clarity (below cloud)	Sunshine will give way by about midday as high cloud thickens. Excellent visibility.
How Cold? (at 900m)	9C rising to 15C.
Freezing Level	Above the summits.

Eryri / Snowdonia National Park - Looking Ahead

	Monday 3 August	Tuesday 4 August
How windy? (On the summits)	Easterly 20 to 25mph.	Generally southerly 20 or 25mph.
Effect of wind on you?	Mostly fairly small.	Mostly fairly small - gusty near showers
How wet? (Precipitation and its impact)	Rain now and again Frequently dry, although occasional rain - perhaps no more than the odd burst - most likely toward evening, when risk of a thundery burst.	Risk heavy showers Confidence low: Patches drizzly rain possible at first before becoming dry. In afternoon heavy, possibly thundery showers may develop.
Cloud on the hills?	Patches may form in rain Most or all hills cloud free, probably all day. But in rain, most likely only later in day fog may begin to shroud some higher slopes, and possibly here and there extend to lower slopes.	Extensive, although may clear at times afternoon Confidence low: In morning, expect blanket of fog across higher areas, sometimes the cloud below 500m or 300m near Lleyn peninsula. Will improve as general cloud base lifts to 500 to 700m, and perhaps clears at times east Wales and north of A5.
Chance of cloud free summits?	80%	30%
Sunshine? Air clarity (below cloud)	Sunshine, often weak, through high level cloud. Some haze, although generally very good visibility.	Occasional sunshine. Hazy, and visibility poor in rain.
How Cold? (at 900m)	15C	14C
Freezing Level	Above the summits.	Above the summits.

Planning Outlook

All mountain areas of Britain from Monday, 3 August, 2026

Confidence in the detail remains low through the first half of the coming week. Areas of rain (and accompanying low cloud) will circulate across Scotland - quite large falls in some areas. Although total rain fairly small across England and Wales, bursts of rain, in places thundery, will occur in some areas.

Later in the week, very little rainfall England and Wales, whilst mainly in western Scotland, some rain from time to time - though probably total rainfall small.

Terrain remains exceptionally dry, ('tinder dry') except for W Scotland.

Forecast issued at 14:07 on Saturday, 1 August, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
