British Mountain Summary:

Based on forecast chart for noon 3 October, 2026

Fine, sunny with light wind mountains in England and Wales. Much of Scotland will be dry but showers, mainly W & NW Highlands, where there will be persistent fog. Progressively windier northwards; near gale force northern Scotland.

Headline for Eryri / Snowdonia National Park

Light wind; extensive sunshine.

Detailed Forecast for Saturday, 3 October, 2026

How windy? (On the summits)	Westerly 15mph dropping gradually to 5 to 10mph.
Effect of wind on you?	Mostly negligible.
How wet? (Precipitation and its impact)	Rain not expected
Cloud on the hills?	Little if any Fragments may shroud some higher slopes after dawn, but all hills clearing.
Chance of cloud free summits?	Almost certain by late morning
Sunshine? Air clarity (below cloud)	Sunny with visibility excellent or superb.
How Cold? (at 900m)	7C to well inland in afternoon 10C.
Freezing Level	Above the summits.

Eryri / Snowdonia National Park - Looking Ahead

	Sunday 4 October	Monday 5 October
How windy? (On the summits) Effect of wind on you?	Southwesterly, 15 to 20mph. Small.	Southwesterly typically 20mph, but where exposed on higher summits Snowdon range, perhaps 30mph. Mostly fairly small, but balance sometimes tricky in sudden gusts, mainly Snowdon range.
How wet? (Precipitation and its impact)	Extensively or completely dry. Risk fine drizzle occasionally, more or less confined to slopes nearest the west coast.	Substantially dry: risk isolated drizzle W. Risk a little drizzle some westernmost slopes. Otherwise dry.
Cloud on the hills? Chance of cloud free summits?	Fog western mountains Persistent low cloud penetrating slowly inland from about dawn. Likely shroud western hills most or all day - perhaps temporarily higher tops above the cloud. As it spreads inland, the cloud may break up before reaching hills north from Berwyn mountains. 10% west to 80% east	Fog probable higher western areas Confidence low: Blanket of low cloud may continue to drift in off the sea to the west, shrouding even lower nearby hills in fog - possibly most or all day. But well inland, the cloud may well break up completely, and the clearance extend back toward the coast. 30%
Sunshine? Air clarity (below cloud)	Sunshine mainly easternmost areas where it may be extensive. Mostly dull western hills. Mostly very good or excellent visibility	There may be extensive sun and excellent visibility east Wales. This may extend back toward the dull and misty coastal areas.
How Cold? (at 900m) Freezing Level	10C. Above the summits.	11C. Above the summits.

Planning Outlook

All mountain areas of Britain from Sunday, 4 October, 2026

Rain at some stage more or less daily on most mountain areas through the coming week. However, total rainfall small, and frequently dry E & S Wales and S Pennines. Frequently windy Scottish Highlands, whilst progressively southwards, periods of strong winds will less frequent. A brief period of colder weather around the middle of next week will bring snowfall to some northern mountains.

Forecast issued at 7:26 on Saturday, 3 October, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
