General Summary for Saturday, 10 October, 2026

British Mountain Summary:

Based on forecast chart for noon 10 October, 2026

Westerly gales across many mountains will make walking challenging and bring significant chill factor; air temperature close to freezing point on highest summits. Rain most persistent in western Scotland, snow falling on high tops. Frequent showery rain for northwest England, fewer showers south across Wales.

Headline for Eryri / Snowdonia National Park

Gales on mountains; showery rain.

Detailed Forecast for Saturday, 10 October, 2026

How windy? (On the summits) Effect of wind on you?	Westerly 35 to 45mph, quite gusty, in places 50mph highest tops in morning, tending to drop somewhat afternoon to 30-35mph. Gradually lowering further onward into night. Challenging conditions in exposure particularly in morning, considerable buffeting always affecting balance, moderating a little. Significant wind chill.
How wet? (Precipitation and its impact)	Showers, most often west Showers stream in from the northwest most of the day, generally light but a few heavy bursts and extended falls over western hills, may fade for a time then return again later.
Cloud on the hills? Chance of cloud free summits?	Mostly northwest areas, highly variable Cloud base will vary considerably, typically between 600-900m, lowest during showers on northwestern aspects. Summits east of highest Snowdon group will see breaks during dry windows, clearest well inland/east. 50%
Sunshine? Air clarity (below cloud)	Patchwork of cloud and sun, more often cloudy northwest Snowdonia NP. Varied visibility, sometimes poor in rain and also a haze.
How Cold? (at 900m) Freezing Level	3 or 4C. Feeling like -7 to -10C in strongest wind. Above the summits.

All mountain areas of Britain from Sunday, 11 October, 2026

After a fine but cool day on Sunday, damp and mild southwesterly air moves back across the country into Monday. Southwesterly winds strengthen late Monday to widely gale-force over the hills, heavier rain likely into early Tuesday, followed by showers and a slight drop of temperature. Very unsettled west-southwesterlies continue into midweek - sustained mountain gales, possibly stormy at times and spells of heavy rain for all areas. A changeable westerly theme likely continues beyond mid-month - occasional windows of drier weather, but more often windy with rain or showers coming in from the Atlantic, sometimes cold enough to fall as snow on Scottish high tops.

Forecast issued at 16:00 on Friday, 9 October, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
