General Summary for Sunday, 1 November, 2026

British Mountain Summary:

Based on forecast chart for noon 1 November, 2026

A fine day for the Highlands, with sunshine and just patchy cloud around some tops. One or two light showers in northern areas. A weakening front drifts south over England & Wales giving cloudy skies and a little rain for a time, mainly more eastern hills. Light-moderate winds overall, but feeling chilly.

Headline for Eryri / Snowdonia National Park

Cloud banks, spots of rain locally; breezy, feeling cool.

Detailed Forecast for Sunday, 1 November, 2026

How windy? (On the summits)	North to northeasterly 20mph, at times 25mph on tops mainly in the morning.
Effect of wind on you?	Fairly small effect on walking, but noticeably breezy and rather chilly over high terrain particularly in the morning.
How wet? (Precipitation and its impact)	Occasional drizzle east/northeast A little patchy drizzly rain, mainly northernmost areas in the morning, with time drifting further south over eastern hills, amounting to very little, later fading out from the north. Very little if any in west.
Cloud on the hills?	Low cloud or fog, breaks west Fairly extensive low cloud, in places fog from lower elevations upward in the morning. Some highest summits may start near top of the cloud layer, mainly in mid-Wales. Some breaks emerge near west coast hills with time.
Chance of cloud free summits?	30%
Sunshine? Air clarity (below cloud)	Rather cloudy and misty over the hills and to some lower elevations in morning, some improvement during day, best in west.
How Cold? (at 900m)	5C, little change all day, slight cooling into the evening. Feeling just below 0C in breeze on tops.
Freezing Level	Above the summits

Eryri / Snowdonia National Park - Looking Ahead

	Monday 2 November	Tuesday 3 November
How windy? (On the summits) Effect of wind on you?	Northeasterly 20 to 25mph, gusty in places around high tops and passes, 30mph at times, speeds tending to rise a Feeling noticeably breezy and chilly on high terrain. Ease of walking more affected locally in gusty areas.	East to northeasterly 20 to 30mph, some stronger gusts possible around high tops and elevated passes. Starting to affect comfortable walking on exposed terrain and some more noticeable gustiness affecting balance. Feeling chilly.
How wet? (Precipitation and its impact)	Rain not expected	Rare drizzle Odd patches of drizzle mostly east and northeastern hills, very little if any toward west coast.
Cloud on the hills? Chance of cloud free summits?	Mostly little Occasional patches grazing higher slopes mostly Carneddau, but often clear toward west coast. 70%	Most persistent east/northeast tops Cloud banks drifting over higher slopes mostly from Carneddau to Bala and Berwyn groups, base around 700m; may thin a little during day. Best breaks westwards and coastal hills clearer. 70% near W coast, to 30% E/NE.
Sunshine? Air clarity (below cloud)	Patchwork of sun, best in west. Visibility very good, some haze lower down.	Fairly cloudy, occasional sun breaking through, sunnier toward west coast. Visibility very good out of cloud.
How Cold? (at 900m) Freezing Level	2 to 4C. Feeling nearer -5C directly in wind. Above the summits, but patchy frost in valleys at first, also some sheltered higher slopes.	4C, little change all day. Feeling like -5C directly in the wind. Above the summits.

Planning Outlook

All mountain areas of Britain from Monday, 2 November, 2026

A settled start to November as high pressure resides toward the north. Largely dry weather throughout the week ahead. Variable cloud will be drawn in from the North Sea on easterly winds, at times some light showers mainly for Pennine areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows. Quiet weather may continue into next weekend, then a trend toward more unsettled conditions into mid-month, possibly colder patterns too.

Forecast issued at 16:00 on Saturday, 31 October, 2026
