General Summary for Tuesday, 3 November, 2026

British Mountain Summary:
Based on forecast chart for noon 3 November, 2026

Cloud drifts across most eastern mountains, more broken westwards; some highest summits in Scotland close to the top of a cloud sheet at times. Local spots of light rain. Light wind northern Scotland, easterly winds elsewhere, stronger over England & Wales. Sunniest toward all western coasts.

Headline for Eryri / Snowdonia National Park

Breezy, gusty; patchy cloud east & north tops, sunnier west.

Detailed Forecast for Tuesday, 3 November, 2026

How windy? (On the summits)	East to northeasterly 25mph, some stronger gusts locally 30mph around high tops and elevated passes, particularly toward mid-Wales.
Effect of wind on you?	**Starting to affect comfortable walking on exposed terrain and some more noticeable gustiness affecting balance. Feeling chilly.**
How wet? (Precipitation and its impact)	**Rare drizzle** Odd patches of drizzle mostly east and northeastern hills in the morning, fading; very little if any toward west coast.
Cloud on the hills?	**Mostly east/northeast tops in morning** Cloud banks drifting over higher slopes mostly from Carneddau to Bala and Berwyn groups, base around 700m; thinning during day. Best breaks westwards and coastal hills clearer.
Chance of cloud free summits?	**30% rising to 70% east/northeast; 70% all day western tops.**
Sunshine? Air clarity (below cloud)	Fairly cloudy, occasional sun breaking through, sunnier toward west coast. Visibility very good out of cloud.
How Cold? (at 900m)	4C, little change all day. Feeling like -5C directly in the wind.
Freezing Level	Above the summits.

Eryri / Snowdonia National Park - Looking Ahead

	Wednesday 4 November	Thursday 5 November
How windy? (On the summits) **Effect of wind on you?**	Easterly 25 to 40mph, very gusty in places around some tops, elevated passes and locally down western slopes. **Affecting comfortable walking on higher slopes, buffeting gusts in places making balance tricky. Considerable wind chill.**	Easterly 30 to 40mph, very gusty around tops, high passes and in places downslope to west; may ease a little during day. **Strenuous walking over the hills, sudden buffeting in places including to some lower elevations; significant wind chill.**
How wet? (Precipitation and its impact)	**Largely dry** Spots of light rain in the wind at times, mainly eastern hills in morning.	**Little or no rain** Rare spots in the wind, mostly eastern hills.
Cloud on the hills? **Chance of cloud free summits?**	**Patches mostly morning** Capping higher slopes in the morning above 700m, most often on eastern hills. Well broken westwards, often lifting higher, increasingly clearing all hills during day. **70%**	**Mostly little, patches north/east** Patchy cloud drifting over some tops mainly in the morning and mostly Carneddau to Bala and Berwyn groups, base around 700m. Well broken westwards, many hills often clear. **70%**
Sunshine? Air clarity (below cloud)	Sunshine best west, patchy cloud east. Visibility good, though some haze especially eastern areas.	Sunshine best toward west coast. Visibility very good.
How Cold? (at 900m) **Freezing Level**	2 or 3C. Feeling like -7 to -10C directly in the wind. Close to freezing on highest summits.	3C. Feeling near -10C directly in the wind. Above the summits.

Planning Outlook

All mountain areas of Britain from Wednesday, 4 November, 2026

High pressure persists toward the north this week, maintaining quiet weather conditions. Easterly winds prevail, strongest during midweek over England & Wales, tending to lessen toward the weekend; wind often lighter and variable toward northern Scotland. Largely dry, local light showers or drizzle mostly in the east. Variable amounts of cloud covering hills, some higher Scottish tops emerging above an inversion at times. Sunnier and clearer near to western coasts. Generally just above freezing over the mountains, but local pockets of frost in shelter and in glens; toward the weekend, high Scottish tops dip just below freezing.
