General Summary for Friday, 13 November, 2026

British Mountain Summary:
Based on forecast chart for noon 13 November, 2026

Under high pressure most mountain areas fine with sunshine. However, progressively north across Scotland, increasing strong westerly wind will bring snow showers to mainly the NW Highlands and low cloud across western mountains. Much terrain frozen - but freezing level rising through day.

Headline for Eryri / Snowdonia National Park

Much terrain frozen - before slow thaw. Periods of sun.

Detailed Forecast for Friday, 13 November, 2026

How windy? (On the summits)	Northwesterly 15mph at first easing to less than 10mph
Effect of wind on you?	**Negligible**
How wet? (Precipitation and its impact)	**A few paling showers Snowdon range to Carneddau** A few light hail showers Snowdon to Tryfan and Carneddau.
Cloud on the hills?	**May shroud higher tops Snowdon range** Increasingly cloud drifting onto tops in Snowdon range above 800m - though it may be afternoon before the cloud forms.
Chance of cloud free summits?	**80%**
Sunshine? Air clarity (below cloud)	Mostly sunny, although cloud may form increasingly from northwest onto the Snowdon range. Visibility excellent.
How Cold? (at 900m)	-1C rising to 1C.
Freezing Level	Terrain nearly all frozen morning, but slowly a thaw will set in from west as freezing level drifts up toward 1000m.

Eryri / Snowdonia National Park - Looking Ahead

	Saturday 14 November	Sunday 15 November
How windy? (On the summits)	South or southwesterly between 25 and perhaps 35mph higher summits Snowdon area.	Very low confidence near centres of low pressure: Varied direction, possible marked lull but anticipate up to 45mph.
Effect of wind on you?	**Fairly small, although notable wind chill where exposed and in the Snowdon area there may well be considerable buffeting.**	**Sometimes small, but zones where wind chill significant and walking difficult - these challenging conditions could set in abruptly.**
How wet? (Precipitation and its impact)	**Extensively dry although risk showers.** A few drizzly showers, probably only western slopes of Snowdon range - giving a little sleet of snow higher slopes morning.	**Periods of rain** Areas of rain will circulate within general low pressure, perhaps falling as snow on higher tops late in day.
Cloud on the hills?	**Mostly confined to higher slopes** Risk Lleyn peninsula to western slopes of Snowdon of cloud frequently above 450 to 650m. Elsewhere, some uncertainty: the hills may be cloud free, but anticipate patches coming and going above 900m,	**Fog very likely across the mountains all day** Fog in some areas from lower slopes up, and few breaks above 600m. There may be an improvement as most cloud rises to above 750m.
Chance of cloud free summits?	**60%**	**20%**
Sunshine? Air clarity (below cloud)	Sunshine, perhaps extensive. Hazy westernmost areas; otherwise visibility very good after fog some valleys morning.	Sunshine occasionally, most likely afternoon. Regions of very poor visibility - but often very good later in day.
How Cold? (at 900m)	0 or -1C tending to rise to 1C. Will feel as cold as minus 6C directly in the wind.	3 to 5C, may abruptly drop toward 0C
Freezing Level	700m rising toward or above highest summits. Frost valleys morning.	Above the summits. But threat change to freezing level of 950m later in day.

Planning Outlook

All mountain areas of Britain from Saturday, 14 November, 2026

Pressure will fall over the weekend: a little rain for some western mountains on Saturday, but more widespread rain (snow higher areas Scottish Highlands) on Sunday - albeit the detail for Sunday is unusually uncertain (for a 3 day forecast). Cold often dry conditions will return on Monday, but beyond extensive rain (sometimes snow higher areas) and strong winds probable, although presently Scotland, particularly the Highlands may have only snow showers in the cold air.

Forecast issued at 7:38 on Friday, 13 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
