General Summary for Monday, 10 July, 2023

British Mountain Summary:

Based on forecast chart for noon 10 July, 2023

Scotland: Southerly or variable wind. Some early patchy rain near west coast. Scattered, slow-moving, showers forming, some afternoon downpours with the risk of local thunderstorms.

England and Wales: Blustery southerly wind. Heavy rain, with risk of thunderstorms, edging north through the day.

Headline for Southeastern Highlands

Scattered, slow-moving, showers or downpours forming. Hill fog in rain.

Detailed Forecast for Monday, 10 July, 2023

How windy? (On the Munros)	Southerly 10 to 20mph, tending to strengthen during day.
Effect of wind on you?	Fairly small, but likely becoming breezier.
How wet? (Precipitation and its impact)	Scattered downpours forming, risk lightning Scattered showers forming, some heavy bursts. Risk of more extensive heavier rain moving up from the south afternoon into evening. Risk of isolated thunder and lightning.
Cloud on the hills?	Clearances to tops, but forming widely in scattered downpours. Varied extent of cloud, some patches on lower and middle slopes in the morning. Some breaks toward higher tops, but if rain fills in, cloud will lower extensively across the hills, patches from forest canopies up.
Chance of cloud free Munros?	70% away from rain, but 40% in rain.
Sunshine? Air clarity (below cloud)	Occasional sun, but skies filling in with cloud as showers develop. Visibility very good for periods, but poor in rain.
How Cold? (at 900m)	9C rising to 12C.
Freezing Level	Above the summits

Southeastern Highlands - Looking Ahead

	Tuesday 11 July	Wednesday 12 July
How windy? (On the Munros) Effect of wind on you?	Speed and direction likely to vary, marked lulls, but sudden gusts around rain. Later becoming northwesterly 15 to 20mph. Often small, may become breezier over the tops, feeling cool.	West later northwesterly, generally 25 to 35mph, but perhaps periods around showers where lifts up to 50mph. Be prepared for arduous conditions for periods, perhaps even difficult in and around showers. Significant wind chill.
How wet? (Precipitation and its impact)	Heavy bursts, risk lightning Local detail uncertain as areas of rain rotate around a broad centre of low pressure over Scotland. Heavy bursts forming, risk merging into a few hours of rain. Localised thunderstorms possible.	Showers, afternoon thundery downpours Detail uncertain: Local drizzle/residual showers at first fading. Then dry for a time, before further showers develop; risk thundery downpours afternoon.
Cloud on the hills?	Fairly extensive Some breaks in the morning, but often shrouding many mountains, local variations in and out of rain. Ragged patches lower slopes upward during/after heavier rain. Breaks possible between cloud banks.	Varied, lowering onto hills in rain. Varied. Early patches at first within any residual drizzle will clear. Then breaks to the tops, but as showers form, ragged patches may form at varying heights.
Chance of cloud free Munros?	40%	60%
Sunshine? Air clarity (below cloud)	Mostly cloudy, brief glimpses of sun, weak due to high cloud. Visibility good away from rain, but many mountains misty, poor conditions in rain.	Skies filled in with cloud often, but some glimpses of sun. Visibility very good, but poor in rain.
How Cold? (at 900m) Freezing Level	8C, little change all day. If wind strengthens, will feel close to freezing on higher tops. Above the summits	6 or 7C Above the summits

Planning Outlook**All mountain areas of Britain from Tuesday, 11 July, 2023**

Staying unsettled through this week with low pressure dominant. Areas of rain and showers will affect all areas. Heavy bursts with a risk of thunderstorms. Temperatures on the cool side across the mountains. Wind speeds will vary, typically west or southwesterly, some lulls, but at times strong giving marked wind chill.

Indications favour unsettled weather continuing through next weekend into the start of the following week with low pressure close to Scotland. Unlikely to see any very warm weather returning in the next couple of weeks.

Forecast issued at 16:44 on Sunday, 9 July, 2023
