Rain and snow showers in w. & nw. Highlands. Temperatures rising through day and freezing level above most Scottish mountains by evening.

Headline for Southeastern Highlands

Upland gales and broken cloud in places

Detailed Forecast for Saturday, 27 January, 2024

How windy? (On the Munros)	Southwesterly 50 to 55mph with least wind in southern regions. Easing to 40mph from mid-afternoon.
Effect of wind on you?	Difficult walking conditions at first, ranging from difficulty with foot placement to being blown over. Beware strong gusts through cols. Severe wind chill.
How wet? (Precipitation and its impact)	Risk of drizzle in places. Risk of light drizzly rain on southern hills, particularly near Ben Lawers. Falling as light snow on high ground.
Cloud on the hills?	Low cloud near Loch Tay Mountains near Loch Tay will be shrouded in cloud from mid-slopes up most of the day. Ben Alder and east of the A9 will have patchy cloud above 1000m.
Chance of cloud free Munros?	40%
Sunshine? Air clarity (below cloud)	Patches of sunshine east of A9. Hazy, particularly near the coast.
How Cold? (at 900m)	1C. Feeling as cold as -15C in the wind.
Freezing Level	1000m in the morning, rising above summits by afternoon.

All mountain areas of Britain from Sunday, 28 January, 2024

Total rainfall will be small on Sunday but a front waving across northern England and Scotland on Monday is providing some uncertainty. England and Wales remaining mostly dry with summits above freezing Tuesday onwards. Dry spells in Scotland punctured by a series of fronts moving across bringing bouts of precipitation and freeze thaw cycles to the Highlands.

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service. 2024.
