## General Summary for Friday, 2 August, 2024

### British Mountain Summary:

#### Based on forecast chart for noon 2 August, 2024

Rain and will advance gradually across Scotland from the middle of the day onwards, and in evening reach mountains close to the Irish Sea. There will also be areas of low cloud. Nevertheless, for many areas, including east Scotland extensively dry and warm. Upland wind approaching gale force western Scotland.

#### Headline for Southeastern Highlands

Increasingly windy. A little rain later afternoon onwards.

## Detailed Forecast for Friday, 2 August, 2024

<b>How windy? (On the Munros)</b>	Southerly, soon 20-30mph, strengthening during the day to 35mph, perhaps west of A9, locally 45mph.
<b>Effect of wind on you?</b>	<b>Walking becoming arduous: widespread buffeting, sudden gusts, even on some lower slopes, will unbalance you.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Rain, mainly late in day west of A9</b> The odd burst of rain almost anywhere. More frequent rain will through afternoon start west of A9, spread east, by late afternoon reaching Angus, where only a little very light rain.
<b>Cloud on the hills?</b>	<b>Most summits clearing for several hours</b> Fog above 600 to 800m after dawn, lifting to 1050m or above for a few hours before lowering to or below 600m in rain, although the low cloud may not reach Glenshee until nearly sunset.
<b>Chance of cloud free Munros?</b>	<b>60% dropping from west later in day toward 10%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Occasional sun, mainly toward and east of Glenshee. Very good visibility, although more haze than recently
<b>How Cold? (at 900m)</b>	14C
<b>Freezing Level</b>	Above the summits

## Southeastern Highlands - Looking Ahead

	<b>Saturday 3 August</b>	<b>Sunday 4 August</b>
<b>How windy? (On the Munros)</b> <b>Effect of wind on you?</b>	West to southwesterly typically 15 to 25mph; probably strongest afternoon  <b>Fairly small, locally gusty on highest tops.</b>	South turning southeasterly and strengthening, firstly 20mph, becoming 30-35mph <b>Starting mostly small, but deteriorating toward the evening, walking becoming strenuous. Marked wind chill.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Shower developing</b> From late morning or midday scattered showers, some heavy.	<b>Starting mostly dry, rain moving in later</b> Extensively dry morning, later in the day occasional rain moving in from the west.
<b>Cloud on the hills?</b>  <b>Chance of cloud free Munros?</b>	<b>Hills nearly all clearing during morning</b>  Cloud base rising through morning, although may come and go above 1050m all day. Near showers, cloud base temporarily below 600m.  <b>70%</b>	<b>Hills extensively cloud-free</b>  Cloud mostly above the hills, perhaps in the morning cloud patches on various levels.  <b>80%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Bright sunshine with mostly fair weather clouds. Mostly excellent or superb visibility.	Some sun in the morning, becoming covered by high and mid-level clouds in the afternoon. Visibility excellent.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	7 rising to 12C  Above the summits	8 to 10C, may feel distinctly colder in wind  Above the summits

**Planning Outlook****All mountain areas of Britain from Saturday, 3 August, 2024**

Low pressure centres, mostly passing northwest of Scotland), and their associated fronts, will intermittently windy and wet conditions next week. Most rainfall will be on western mountains, with considerable rainfall on the W & NW highlands of Scotland. Frequently windy across Scotland. Lowest rainfall will be in eastern Scotland, the southern Pennines and easternmost Wales. Temperature wise warm and very humid on Monday, but through the week generally colder than this week.

**Forecast issued at 15:32 on Thursday, 1 August, 2024**
