General Summary for Friday, 9 May, 2025

British Mountain Summary:

Based on forecast chart for noon 9 May, 2025

In Scotland, thin mist in the glens and isolated cloud caps over highest tops at dawn will soon clear for cloud free hills. Isolated low morning fog in eastern valleys of England and Wales as well, also soon clearing. A patchwork of sun for most as high fair-weather cloud builds, feeling warm in direct sun. Mostly light winds.

Headline for Southeastern Highlands

Dry with patchy high cloud increasing; breeze in the east later

Detailed Forecast for Friday, 9 May, 2025

How windy? (On the Munros)	Variable or southwesterly 15mph or less. Easternmost hills seeing breezes up to 20mph as dusk approaches.
Effect of wind on you?	Mostly small
How wet? (Precipitation and its impact)	No rain
Cloud on the hills?	Little if any on highest tops at dawn, then cloud-free Chance of isolated cloud caps over highest summits near Glenshee at dawn. Thin local mists in inland glens at dawn as well. Cloud soon lifts and dissipates for cloud-free mountains.
Chance of cloud free Munros?	Above 90%
Sunshine? Air clarity (below cloud)	Sunshine and patchy fair-weather cloud. Cloud builds in the afternoon but intermittent bursts of sun will continue. Visibility excellent, a slight haze near the Central Belt in the morning.
How Cold? (at 900m)	7 or 8C, rising to 12C by afternoon.
Freezing Level	Above the summits

Southeastern Highlands - Looking Ahead

	Saturday 10 May	Sunday 11 May
How windy? (On the Munros)	South to southwesterly 10 to 20mph. Slight rise in speeds around dusk.	Southerly 10-20mph. Wind direction may become variable through afternoon.
Effect of wind on you?	Fairly small	Mostly small
How wet? (Precipitation and its impact)	Rain unlikely	Little if any Chance of few isolated spots of light rain
Cloud on the hills?	Not expected	Not expected
Chance of cloud free Munros?	Above 90%	Above 90%
Sunshine? Air clarity (below cloud)	Mostly sunny, some fair weather cloud building after noon. Visibility excellent.	Mostly sunny, a patchwork of cloud building. Mostly cloudy in the west later. Excellent visibility.
How Cold? (at 900m)	5C from dawn, rising to 11C afternoon.	8 or 9C, rising only slightly during daylight
Freezing Level	Above the summits	Above the summits

Planning Outlook

All mountain areas of Britain from Saturday, 10 May, 2025

Low pressure south and west of the British Isles will facilitate bursts of rain into Wales though the weekend into next week. High pressure to the east keeps most eastern areas settled during this time. The continental wind track will keep most cloud above the summits, with eastern areas often sunny. Generally settled conditions prevail next week as high pressure reestablishes just north of the British Isles, though odd bursts of rain come and go in Wales. A mix of cloud and sun with light winds, generally easterly though variable. Slight frosts at dawn in sheltered spots, mostly warm by day. Very dry ground conditions, beware high risk of fire.

Forecast issued at 15:30 on Thursday, 8 May, 2025

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary.
