### General Summary for Monday, 30 June, 2025

#### British Mountain Summary:

#### Based on forecast chart for noon 30 June, 2025

Very warm and humid. Gale force southerly winds for NW Scotland at first will ease, but gusty winds strengthen elsewhere. As a front encroaches from the west across the Highlands, bursts of rain will merge into a swathe of more extensive heavy rain, possible thunder. Dry with sunshine for England and Wales, small risk local showers.

#### Headline for Southeastern Highlands

Windy, gusty. Warm; high cloud, rain mostly later, turning heavy west.

### Detailed Forecast for Monday, 30 June, 2025

<b>How windy? (On the Munros)</b>	South to southwesterly 25 to 35mph, at times reaching 40-45mph around higher tops at least in gusts.
<b>Effect of wind on you?</b>	<b>Strenuous walking on higher terrain, buffeting gusts in places over high tops and through some passes.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Often dry, bursts of rain develop, setting in later west</b> Occasional spots from high cloud, chance of odd bursts of rain forming. Later afternoon into evening, heavier rain moving in from west, soonest central highlands, setting in here, chance of thundery bursts mixed in.
<b>Cloud on the hills?</b>  <b>Chance of cloud free Munros?</b>	<b>Low cloud in morning gradually clears</b> Low cloud may be fairly extensive in the morning, varied at different heights, most persistent central highlands. Tending to lift, thin and break up from many hills. Returning and lowering over hills as rain develops. <b>20% rising to 70%, then later 20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Varied high cloud thickens to cover the sun increasingly. Misty in the morning, visibility improving to be very good below cloud; reducing later in rain.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	12C where in cloud, up to 16C eastern areas; very humid. Likely to drop considerably into night, toward 7C.  Above the summits

## Southeastern Highlands - Looking Ahead

	<b>Tuesday 1 July</b>	<b>Wednesday 2 July</b>
<b>How windy? (On the Munros)</b>	Westerly or variable 10 to 15mph or less.	Westerly 10 to 15mph or less.
<b>Effect of wind on you?</b>	<b>Small</b>	<b>Small</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Risk a heavy shower later</b> Remnants of overnight rain soon fades. By afternoon, risk of localised slow-moving showers forming, possibly heavy, an isolated thundery burst.	<b>Risk local heavy showers later</b> Scattered showers forming mainly mid-late afternoon onward, local heavy bursts, greatest risk eastern areas toward evening, chance of isolated thunder.
<b>Cloud on the hills?</b>	<b>Lifting and mostly clearing</b>  Variable cloud banks in morning, soon mostly confined to upper slopes, breaks forming, many tops clearing by midday. If showers occur, some lowering patches.	<b>Mostly clear, patches in showers</b>  Rare patches briefly around upper slopes in the morning, lifting above the tops. If showers form, cloud banks forming over tops, local patches lower down.
<b>Chance of cloud free Munros?</b>	<b>70%</b>	<b>80%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Occasional sun in morning, cloud bubbling up afternoon, may fill in. Visibility mostly excellent.	Patchwork of sun and cloud, may build and fill in afternoon. Visibility excellent.
<b>How Cold? (at 900m)</b>	8 to 10C.	7 to 10C.
<b>Freezing Level</b>	Above the summits	Above the summits

**Planning Outlook****All mountain areas of Britain from Tuesday, 1 July, 2025**

Cooler across Scotland by Monday night as a cold front advances eastwards. Risk of scattered thundery showers Tuesday-Wednesday, mostly eastern areas. High pressure then builds to the south, whilst a humid southwesterly returns to bring spells of rain and low cloud to western Scotland. The second week of July looks cooler for all with sunshine and showers.

**Forecast issued at 16:00 on Sunday, 29 June, 2025**
