### General Summary for Sunday, 6 July, 2025

#### British Mountain Summary:

#### Based on forecast chart for noon 6 July, 2025

Cloud on higher hills with patchy rain for many areas in the morning. Later, a band of showers forms from central highlands southward into England, drifting down the Pennines; showers will give heavy bursts with a risk of few lightning flashes southern Scotland. Damp in Wales early, gradually improving.

#### Headline for Southeastern Highlands

Rain and cloud clears for a time, showers later

### Detailed Forecast for Sunday, 6 July, 2025

<b>How windy? (On the Munros)</b>	North-northwesterly 15-20mph. Winds may notably ease around Callander area late in the day.
<b>Effect of wind on you?</b>	Fairly small.
<b>How wet?</b> (Precipitation and its impact)	<b>Showery rain on and off, then risk of showery bursts later</b> Showery rain on and off, heavy bursts at times. Easing for much of the afternoon, though risk of scattered showers with heavy bursts returning late in the day.
<b>Cloud on the hills?</b>	<b>Patchy on high areas early, lifting; returning to tops in rain</b> Patchy cloud often above 800-900m, nearer 900-1000m around Loch Tay with breaks to tops here. Generally breaking and lifting to clear many tops, most often clear around A9 and westward - may fill in at times around rain.
<b>Chance of cloud free Munros?</b>	<b>30%, rising to 70%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Little or no sun, only glimpses later. Excellent visibility.
<b>How Cold? (at 900m)</b>	8C in the morning, rising to 10C.
<b>Freezing Level</b>	Above the summits

## Southeastern Highlands - Looking Ahead

	Monday 7 July	Tuesday 8 July
<b>How windy? (On the Munros)</b>  <b>Effect of wind on you?</b>	Northwesterly 25-35mph early, risk stronger east of A9. Then 25mph most of the day with stronger gusts over tops. <b>Often buffeting gusts over high terrain and downslope, may challenge stability at times. Feeling cool.</b>	Northwesterly shifting westerly, 15-25mph, strongest early. Winds may ease to a lull for a time midday/afternoon. <b>Fairly small, though notable gusts over tops when winds are stronger.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Substantially dry, risk showers later</b> A few odd showers may drift onto northernmost hills east of the A9. Later, risk of heavier showers, an odd flash of lightning possible well east.	<b>No rain until late</b> Local spots of drizzly rain arrive onto central highlands hills late in the day, amounting to very little.
<b>Cloud on the hills?</b>	<b>Summits increasingly cloud-free</b>  Some cloud caps over high tops in the morning, lifting and breaking for largely cloud-free summits.	<b>Intermittent caps over tops only later</b>  A few cloud caps over high tops towards central highlands soon lift off summits. Into evening, patchy cloud intermittently returns to high tops, at times drifting down west slopes towards central highlands.
<b>Chance of cloud free Munros?</b>	<b>Soon 90%</b>	<b>Above 90%, reducing to 60% late</b>
<b>Sunshine?</b> Air clarity (below cloud)	Patchy sun becoming fairly extensive; fair weather cloud develops later, mostly east. Excellent visibility.	Fairly extensive sun early though high cloud building, largely overcast later. Excellent visibility.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	6C rising to 10 or 11C. Feeling like 3C in the wind.  Above the summits	8C and rising, though with a west-to-east contrast: near 12C Callander area, up to 14C Glenshee.  Above the summits

## Planning Outlook

### All mountain areas of Britain from Monday, 7 July, 2025

A generally settled start to the week as high pressure will become dominant across England and Wales Monday and Tuesday. Expect substantially dry conditions here through much of the week with good periods of sunshine. In Scotland, low pressure to the north will facilitate a consistent west-southwesterly wind, driving several weak fronts onto northwestern coasts as the week goes - often cloudy here with periods of rain, tending to be drier with sunny spells in east Scotland. Temperatures will be near average. Some uncertainty about next weekend - fronts are likely to continue drifting towards Scotland and north England, though possibly interrupted by dry and warm air from the continent.

### Forecast issued at 16:29 on Saturday, 5 July, 2025

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary.
