### General Summary for Friday, 11 July, 2025

#### British Mountain Summary:

#### Based on forecast chart for noon 11 July, 2025

Sunny and very warm across most areas with light or negligible wind - beware risk of sunburn and dehydration. Warm temperatures will persist overnight. Temperatures nearer the middle teens on Scotland's west coast in the breeze, some early patchy cloud onto Skye and coastal slopes to the south.

#### Headline for Southeastern Highlands

Sunny and very warm, staying warm into night

### Detailed Forecast for Friday, 11 July, 2025

<b>How windy? (On the Munros)</b>	South to southwesterly 10-15mph.
<b>Effect of wind on you?</b>	Mostly small.
<b>How wet?</b> (Precipitation and its impact)	No rain
<b>Cloud on the hills?</b>	<b>Summits soon cloud-free</b> Odd patches over tops near central highlands, these fading through morning for cloud-free summits.
<b>Chance of cloud free Munros?</b>	<b>90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Widespread strong sunshine through high-level cloud; beware sunburn and dehydration. Excellent visibility.
<b>How Cold? (at 900m)</b>	13C in the morning, rising to 17 to 18C in the afternoon.
<b>Freezing Level</b>	Well above the summits. (Little change of temperature overnight on high ground, possibly slight increase.)

## Southeastern Highlands - Looking Ahead

	Saturday 12 July	Sunday 13 July
<b>How windy? (On the Munros)</b>  <b>Effect of wind on you?</b>	Southerly 15mph or often less, becoming variable direction at times. Shifting southeasterly later. <b>Mostly small.</b>	South to southeasterly 10-15mph.  <b>Mostly small</b>
<b>How wet?</b> (Precipitation and its impact)	<b>No rain</b>	<b>No rain expected</b>
<b>Cloud on the hills?</b>          <b>Chance of cloud free Munros?</b>	<b>Hills clear</b>  Only odd local patches of haar on easternmost slopes at dawn, soon fading for cloud-free hills.     <b>Almost certain</b>	<b>Hills clear</b>  Local patches of haar on lowest eastern slopes at dawn soon clear for cloud-free hills. Chance of low fog patches returning as night falls.     <b>Above 90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Widespread strong sunshine; beware sunburn, dehydration and heatstroke. Excellent visibility.	Sunny most of the day, some high cloud at times weakening the sun. Excellent visibility.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	16C rising to 19C by mid-afternoon, remaining warm overnight on high ground.  Well above the summits. (Valley temperatures 25C or above in the afternoon.)	15 to 16C at dawn, rising towards 18C. Easternmost slopes may stay nearer 17C.  Above the summits

## Planning Outlook

### All mountain areas of Britain from Saturday, 12 July, 2025

Very warm or hot conditions this weekend in the mountains and the valleys, with extreme risk of wildfire in Scotland; beware dehydration and sunburn. Light winds and very little cloud.

Low pressure returns late Sunday into Monday bringing rain to most, risk heavy or thunderstorms north England and Scotland. Temperatures will cool towards average and often raining for the first half of the week. Becoming more mixed from mid-week as pressure goes slack and Atlantic fronts make only weak pushes from the west. Patchy rain and cloud will come and go with the best opportunities for sun in north and western areas.

### Forecast issued at 16:08 on Thursday, 10 July, 2025

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary.
