### General Summary for Thursday, 4 September, 2025

#### British Mountain Summary:

#### Based on forecast chart for noon 4 September, 2025

Showery southwesterlies across Scotland, local heavy bursts forming and moving further eastwards through the afternoon. Showers too for northern England, but a cluster of more prolonged heavy and thundery rain affects Wales in the morning, soon also Peak District, clearing to scattered showers.

#### Headline for Southeastern Highlands

Scattered heavy showers mostly into afternoon; breezy.

### Detailed Forecast for Thursday, 4 September, 2025

<b>How windy? (On the Munros)</b>	West-southwesterly 15-25mph, sudden gusts around showers.
<b>Effect of wind on you?</b>	Fairly small, but starting to affect comfortable walking at times on exposed tops.
<b>How wet?</b> (Precipitation and its impact)	<b>Showers developing, briefly heavy</b> Patchy overnight rain clears east before dawn, leaving the morning largely dry. Showers increasingly form late morning into afternoon, scattered brief heavy bursts advancing eastward, chance of isolated thunder.
<b>Cloud on the hills?</b>	<b>Well broken, then variable around rain</b> Variable cloud in the morning, most extensive above 900-1000m. Bases will lift and become increasingly broken towards high tops, best clearance east of A9. Variable cloud will reform around and after rain.
<b>Chance of cloud free Munros?</b>	70%
<b>Sunshine?</b> Air clarity (below cloud)	Often sunny for a time in morning, cloud bubbling up to cover sky for periods afternoon. Excellent visibility, briefly reduced in showers.
<b>How Cold? (at 900m)</b>	7 or 8C from dawn. Slight rise to 9 or 10C around east Glenshee/Angus hills. Feeling near freezing in strongest wind.
<b>Freezing Level</b>	Above the summits

**All mountain areas of Britain from Friday, 5 September, 2025**

A brief settled spell on Friday and Saturday as weak high pressure brings drier, warmer conditions, though likely quite cloudy. Southerly winds increase in western regions on Saturday, ahead of a rain system arriving into Sunday. Low pressure then continues to dominate for the foreseeable future, maintaining unsettled conditions widely next week. Expect areas of rain and heavy showers, risk of hail and thunder. A steady westerly wind establishes, bringing frequent cloudy, showery conditions to western areas with fronts coming and going. Eastern areas will see occasional brief dry and clear periods.

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
