### General Summary for Saturday, 11 October, 2025

#### British Mountain Summary:

#### Based on forecast chart for noon 11 October, 2025

Cloud fairly extensive across Scottish highlands, lowest bases west and drizzle over high west coast tops; blustery in the far north. Dry elsewhere with negligible wind. Variable cloud and low fog in the morning lifts to upper slopes, likely above many Pennines. Best of sunny breaks in Wales, highest tops above an inversion.

#### Headline for Southeastern Highlands

Cloud on high ground but variable; some light rain east

### Detailed Forecast for Saturday, 11 October, 2025

<b>How windy? (On the Munros)</b>	West-northwesterly 15mph, very locally gusty 25mph around some slopes, not just on highest terrain. Easing through afternoon.
<b>Effect of wind on you?</b>	<b>Fairly small, but some local sudden gusty spots which may start to affect balance around higher mountains.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Chance of patchy rain east afternoon</b> Chance of some patchy light rain west of the A9 afternoon, greatest risk east of Glenshee. Most areas dry all day.
<b>Cloud on the hills?</b>	<b>Variable, mostly upper slopes of central highlands</b> Cloud most extensive on mountains in central highlands, bases 700-800m in the morning, plus some local mist in glens at first. More broken to the east, but may variably fill in for several hours around midday.
<b>Chance of cloud free Munros?</b>	<b>50%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Some glimpses of sun in the east but weakened by higher cloud, at times overcast. Visibility excellent below cloud.
<b>How Cold? (at 900m)</b>	At dawn, 7C around Monadhliath, up to 9C eastern Cairngorms. Most areas will see a 2C rise (to 9 and 11C respectively). Little change with added height.
<b>Freezing Level</b>	Above the summits

## Southeastern Highlands - Looking Ahead

	Sunday 12 October	Monday 13 October
<b>How windy? (On the Munros)</b>	Variable 10mph or less. Some local gustiness.	Generally westerly but variable, 10mph or less. Some gusts may form at all heights.
<b>Effect of wind on you?</b>	<b>Negligible.</b>	<b>Small</b>
<b>How wet?</b> (Precipitation and its impact)	<b>No rain expected</b>	<b>No rain expected</b>
<b>Cloud on the hills?</b>	<b>Patchy cloud banks lift to high slopes</b>  Fog in the glens and corries in the morning with banks up to middle and higher slopes. Fog will dissipate but cloud patches linger above 700m; some highest central highlands tops near or just above the cloud. Cloud may be more sheet-like east of A9.	<b>Mid-level cloud banks, thicker in places</b>  Dawn fog in many glens, particularly west of A9 where the fog layer possibly thicker. Tending to lift with most cloud between 600-900m, some banks drifting higher. Highest tops likely above the cloud layer.
<b>Chance of cloud free Munros?</b>	<b>50% highest tops of central highlands above cloud</b>	<b>70% (summits above cloud)</b>
<b>Sunshine?</b> Air clarity (below cloud)	A patchwork of cloud and sun, at times more overcast. Good visibility out of cloud, excellent where above cloud layer.	Widely sunny above the cloud layer. Excellent visibility, some low level haze around eastern lowlands.
<b>How Cold? (at 900m)</b>	9 or 10C, may rise slightly. Little change or slight rise in temperature with height.	11C. May rise a degree or two where in sunshine.
<b>Freezing Level</b>	Above the summits	Above the summits

## Planning Outlook

### All mountain areas of Britain from Sunday, 12 October, 2025

A high pressure cores establishes over the British Isles through the upcoming week, bringing light winds and dry weather conditions. Scope for inversion conditions locally, first in north Wales and Lakeland then near high Scottish tops. Into the week, mixed cloud and sun with occasional longer spells of cloud or sunshine. Valley fog and patchy low- and middle-slope cloud will be common and possibly quite variable from day-to-day. Easterly winds are expected to increase with time for England and Wales, particularly in the south where there could be notable gusts over high terrain. Pleasant daytime temperatures where in sunshine, some cooler nights with slight frost where skies are clear. First indications suggest next weekend starts mostly settled.

### Forecast issued at 15:50 on Friday, 10 October, 2025
