General Summary for Wednesday, 10 December, 2025

British Mountain Summary:

Based on forecast chart for noon 10 December, 2025

Storm-force winds continue over Scottish mountains, beware of storm damage and blocked routes. Gales remain severe over high terrain in northern England and tops in north Wales. Showery rain, hail and on higher tops snow in the Highlands, near-constant in the west. Bands of showers northern England, fewer for Wales.

Headline for Southeastern Highlands

Storm-force upland winds. Rain most frequent west.

Detailed Forecast for Wednesday, 10 December, 2025

How windy? (On the Munros)	Southwesterly 50 to 70mph, risk 80mph on higher mountains, with stronger gusts, mainly up to dawn, but may re-strengthen somewhat during afternoon.
Effect of wind on you?	Difficult walking conditions from mid elevations upward, general mobility challenging in exposure over higher mountains; significant wind chill.
How wet? (Precipitation and its impact)	Showers mostly west, snow tops Showery precipitation most common central highlands west of the A9, falling as sleet or snow above 1000m in morning, possible hail. Wet underfoot, streams in spate, some flooding.
Cloud on the hills?	Frequently on tops Cloud base constantly changing, but often capping higher slopes, most persistent tops in Callander area.
Chance of cloud free Munros?	30%
Sunshine? Air clarity (below cloud)	Occasional sun mostly north and east. Slight haze, visibility reduced further around showers.
How Cold? (at 900m)	2 or 3C, rising slightly into evening-night. Wind chill feeling near to -15C.
Freezing Level	1100 to 1200m, lifting above higher summits mid-afternoon onward.

All mountain areas of Britain from Thursday, 11 December, 2025

Staying unsettled as southwesterly winds prevail and low pressure systems pass to the northwest of Scotland; sustained gales over the mountains, severe or stormy for periods. Temperatures only just below freezing intermittently on higher Scottish tops, even here will experience spells above freezing with thawing, any lying snow patchy, but beware some icy surfaces on the very highest tops where some refreezing occurs. Driest in eastern areas on Thursday, otherwise rainfall will be frequent and heavy, sometimes showery with hail. Expect wet ground conditions and further flooding of streams and some rivers.

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
