## General Summary for Monday, 1 June, 2026

### British Mountain Summary:

**Based on forecast chart for noon 1 June, 2026**

Rain affects all areas during the day, some heavy falls widely, most constant in Wales. Low cloud across the hills, blanketing to lower slopes in west coastal areas. South-southwest winds, varied in Scotland, but stronger England and particularly Wales, here gales over tops. Fairly mild air, but feeling cooler in wind.

### Headline for Southeastern Highlands

Breezy over tops. Rain on and off, heavier at times, low cloud.

## Detailed Forecast for Monday, 1 June, 2026

<b>How windy? (On the Munros)</b>	Southerly, 15 to 25mph, tending to increase in morning, up to 30mph high tops for a time, then lessening a little from southwest during afternoon.
<b>Effect of wind on you?</b>	<b>Some variation during day, at times fairly small, but gustier spots affecting comfortable walking for a few hours on exposed high ridges and tops.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Rain frequent or persistent, some heavy</b> Spots of light rain patchy at dawn, but soon develops into fairly frequent rain widely, steadier rain at times, some heavier, risk often raining central highlands much of the day. Intermittently drier east of A9, but expect rain on and off.
<b>Cloud on the hills?</b>	<b>Soon extensive and low across hills</b> Variable banks at first, local breaks mostly northeast of Pitlochry, but cloud soon lowering fairly extensively covering hills above 500-700m, lowest on southern aspects.
<b>Chance of cloud free Munros?</b>	<b>Dropping in morning to 10%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Overcast and dull, murky across hills in rain, local improvements below cloud, but visibility often poor.
<b>How Cold? (at 900m)</b>	6C rising to 9C. Feeling near -5C directly in the stronger wind over high tops in morning.
<b>Freezing Level</b>	Above the summits.

## Southeastern Highlands - Looking Ahead

	<b>Tuesday 2 June</b>	<b>Wednesday 3 June</b>
<b>How windy? (On the Munros)</b>  <b>Effect of wind on you?</b>	West-southwesterly 10 to 20mph, may increase gustier 20-25mph in south later.  <b>Mostly small, but feeling breezier with time.</b>	South-southwesterly 25 to 40mph, chance of increasing further during day, possible 50mph highest summits at least in gusts.  <b>Very blustery, strenuous walking in exposure, buffeting gusts on ridges and tops. Considerable wind chill.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Showers, becoming heavy, thundery</b> Scattered showers in morning developing more widely into afternoon, some heavier bursts, later in day more concentrated toward the east, risk of isolated thunder.	<b>Rain becomes persistent west</b> Rain extends in from the southwest, becoming fairly persistent particularly central highlands, heavier at times; patchier smaller amounts eastward.
<b>Cloud on the hills?</b>  <b>Chance of cloud free Munros?</b>	<b>Varied over tops, some breaks</b>  Patchy cloud banks over hills in morning, becoming confined to upper slopes with breaks to tops. Around showers, cloud lowering over hills, varied ragged patches.  <b>50%</b>	<b>Fairly extensive</b>  Covering most hills all day above 600 to 800m, lowest persistent cloud for western areas up to the A9 corridor. Some higher breaks eastwards, mainly morning.  <b>20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Glimpses of sun, though possibly often cloudy. Visibility very good, reduced in showers.	Glimpses of sun mainly eastern areas. Visibility good below cloud, reduced around rain, poor at times in west.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	8C up to 10C afternoon.  Above the summits.	6 or 7C, slight rise afternoon. Wind chill feeling like -5 to -8C.  Above the summits.

**Planning Outlook****All mountain areas of Britain from Tuesday, 2 June, 2026**

An unsettled spell through early June, possibly through the first two weeks, as low pressure over the north Atlantic and southwesterly winds dominate. Periods of rain mixed with showery days widely - the most constant rain over western mountains with low cloud often shrouding the hills. Wind speed will vary, but up to gale-force for periods over the hills, mostly in Scotland by later this week. Higher pressure to the south tends to expand across and just east of Britain later in the week, bringing some drier weather, but western hills even in England and Wales may remain often misty and drizzly. Temperatures near average, cooler at times. Mid June onward shows signs of drier and warmer weather.
