General Summary for Sunday, 26 July, 2026

British Mountain Summary:

Based on forecast chart for noon 26 July, 2026

Spells of rain and showers affect most places during the day, some heavier falls toward eastern Scotland in afternoon. Cloud covering most high terrain, bases rising during day, breaks emerge at times. Blustery winds for England, Wales and southern Scotland, more moderate speeds for the Highlands.

Headline for Southeastern Highlands

Patchy rain, showers, varied cloud. Moderate breeze.

Detailed Forecast for Sunday, 26 July, 2026

How windy? (On the Munros)	West-northwesterly 15 to 25mph, some stronger gusts over 30mph mainly toward Callander hills in morning, later in the day more widely, gusts around showers in east.
Effect of wind on you?	Fairly small, some more breezier slopes in exposure, blustery early in day near central belt, later gusty further east too. Feeling cool on tops.
How wet? (Precipitation and its impact)	Periods of showery rain Patchy rain drifts from the northwest, both wetter and drier windows through the day, Some heavier afternoon showers near and east of A9, locally a cluster of more frequent rain.
Cloud on the hills?	Fairly extensive, breaks above summits east From dawn, central highlands slopes above 700-800m in cloud, more broken with bases near the summits eastward. Cloud will lift through morning, to summit level with breaks east, but banks returning above 700m where showers occur.
Chance of cloud free Munros?	50%
Sunshine? Air clarity (below cloud)	Fairly cloudy, glimpses of sunshine. Often very good visibility but reduced in showers.
How Cold? (at 900m)	8C, rising to 11C, warmest towards central highlands.
Freezing Level	Above the summits.

All mountain areas of Britain from Monday, 27 July, 2026

West-southwesterly winds will bring rain to most places early in the new week, some more prolonged heavier falls for western Scotland by Tuesday, accompanied by gales over high terrain, severe on Scottish tops, but rather humid for all, warm for England and Wales. Cooler air toward northwest Scotland moves across all of Scotland by Wednesday. Showery rain through mid-late week, some heavy and possibly thundery bursts, mainly Scotland. Likely drier for Wales and southern Pennines. More uncertainty toward next weekend and early the following week, but a risk of a broad zone of low pressure bringing areas of rain and heavy showers through early August.
