General Summary for Tuesday, 4 August, 2026

British Mountain Summary:

Based on forecast chart for noon 4 August, 2026

Extensive rain and low cloud across Scotland, becoming thundery downpours into the afternoon from the south into the Highlands. For England & Wales, rain and low cloud most persistent in the morning, heavy showery bursts in middle of day tending to clear eastward afternoon. Strong and gusty winds widely.

Headline for Southeastern Highlands

Rain and thundery downpours, low cloud; strongest wind easing.

Detailed Forecast for Tuesday, 4 August, 2026

How windy? (On the Munros)	Easterly 25mph to in places a gusty 35mph for a few hours from dawn, turning southerly and easing a little, but sudden powerful gusts around rain.
Effect of wind on you?	Challenging conditions early in the day, very gusty in places. Staying blustery all day though some improvement. Feeling cool in exposure higher up.
How wet? (Precipitation and its impact)	Raining most or all day; thundery bursts Rain affects much of the region all day, some heavier falls at times. Some heavy downpours forming into middle of day into afternoon, continuing into evening, drifting northwards, with risk of thunder and lightning.
Cloud on the hills?	Extensive low cloud Blanket of fog all day across higher areas, sometimes the cloud below 300 m Angus and Ochils. Breaks to 700m, mainly west of A9.
Chance of cloud free Munros?	Below 10%
Sunshine? Air clarity (below cloud)	Overcast and murky. Visibility often poor.
How Cold? (at 900m)	8C. Feeling near to freezing directly in the wind.
Freezing Level	Above the summits.

All mountain areas of Britain from Wednesday, 5 August, 2026

Low pressure over the country during midweek brings strong winds, rain and thundery showers. Trending toward westerlies later in the week and into weekend, by then most rain and low cloud in western Scotland, but showery rain elsewhere at times, accompanied by periods of strong to gale force mountain winds at times. Generally fresh temperatures widely, often in mid-single figures over Scottish high tops. Despite falls of rain, beware of ongoing fire management restricting access to hills locally.
