General Summary for Monday, 10 August, 2026

British Mountain Summary:

Based on forecast chart for noon 10 August, 2026

Windy in northern and western Scotland, particularly morning. Elsewhere, the breeze dropping away. Periods of bright sunshine, particularly England and Wales - beware sunburn. Only occasional sunshine toward NW Scotland.

Headline for Southeastern Highlands

Wind progressively dropping. Intermittent bright sun.

Detailed Forecast for Monday, 10 August, 2026

How windy? (On the Munros)	Northwesterly 15-25mph morning, least wind west of A9 and Ochils. Will gradually drop to around 10mph by late afternoon.
Effect of wind on you?	Becoming small
How wet? (Precipitation and its impact)	Chance of a shower Chance isolated brief shower.
Cloud on the hills?	Very little if any from mid morning Patches some higher slopes will clear by about mid morning.
Chance of cloud free Munros?	Almost certain by late morning
Sunshine? Air clarity (below cloud)	Patchwork of or extensive bright sunshine. Excellent or increasingly superb visibility.
How Cold? (at 900m)	5C, gradually rising toward 13C.
Freezing Level	Above the summits.

Southeastern Highlands - Looking Ahead

	Tuesday 11 August	Wednesday 12 August
How windy? (On the Munros)	Southerly 10 to 15mph.	Southerly increasing from around 10mph lower slopes to 30mph, locally 35mph on higher tops.
Effect of wind on you?	Mostly negligible	Will increasingly impede ease of walking with height; sudden gusts, in places blowing downslope off higher terrain.
How wet? (Precipitation and its impact)	Rain not expected	Risk of a burst of showery rain A few showers, some briefly heavy, but substantially dry.
Cloud on the hills?	Fog, perhaps extensive 'mid-slopes' morning (higher tops above the cloud). In morning cloud above about 500m perhaps widely, especially east of the A9. The top of the cloud probably 1000m. The cloud will gradually disperse mid to late morning, although isolated patches into the afternoon.	Most or all summits cloud free Chance cloud covering higher tops at times, most likely above 600 to 900m in morning .
Chance of cloud free Munros?	80% (some or many lower areas foggy morning)	70%
Sunshine? Air clarity (below cloud)	Extensive sunshine developing although often through high thin cloud and possibly cloudy some areas morning. Superb visibility.	Intermittent sunshine. Excellent visibility although slight haze.
How Cold? (at 900m)	7C rising to 16C	11 rising to 16C.
Freezing Level	Above the summits.	Above the summits.

Planning Outlook**All mountain areas of Britain from Tuesday, 11 August, 2026**

Chance of bursts of rain, possibly locally thundery on Wednesday NW England northwards, with further occasional rain (and low cloud) later in the week, mainly across the W & NW Highlands.
The almost completely dry and warm weather will persist elsewhere. Underfoot conditions will remain exceptionally dry.
There may well be little change in the pattern into next week.
