General Summary for Saturday, 3 October, 2026

British Mountain Summary:

Based on forecast chart for noon 3 October, 2026

Fine, sunny with light wind mountains in England and Wales. Much of Scotland will be dry but showers, mainly W & NW Highlands, where there will be persistent fog. Progressively windier northwards; near gale force northern Scotland.

Headline for Southeastern Highlands

Windy; fog mostly confined to higher tops.

Detailed Forecast for Saturday, 3 October, 2026

How windy? (On the Munros)	West backing southwesterly 25-30mph. Mostly 20mph lower summits south of Perth.
Effect of wind on you?	Will impede ease of walking on higher areas, and marked wind chill.
How wet? (Precipitation and its impact)	A few showers One or two brief showers, mainly west if A9 afternoon.
Cloud on the hills?	Confined to higher slopes; largely clearing east of A9 Cloud mostly covering higher slopes most of morning; by midday west of A9 most cloud above 650m with breaks to 900m, perhaps 1050m. East of A9, most cloud above 900 to 1050m by midday.
Chance of cloud free Munros?	By midday 20% west of A9 to 90% east of Glenshee
Sunshine? Air clarity (below cloud)	Intermittent sun, most sun toward and east of Glenshee and Ochils. Very good visibility.
How Cold? (at 900m)	5C, but will feel as cold as minus 4C directly in the wind.
Freezing Level	Above the summits.

All mountain areas of Britain from Sunday, 4 October, 2026

Rain at some stage more or less daily on most mountain areas through the coming week. However, total rainfall small, and frequently dry E & S Wales and S Pennines. Frequently windy Scottish Highlands, whilst progressively southwards, periods of strong winds will less frequent. A brief period of colder weather around the middle of next week will bring snowfall to some northern mountains.
