General Summary for Sunday, 4 October, 2026

British Mountain Summary:

Based on forecast chart for noon 4 October, 2026

A weakening warm front will gradually bring low cloud to western hills of NW England and Wales. Blustery N England. In Scotland, widespread gales; in the NW & W Highlands, heavy rain and fog, but only occasional rain eastern and southern Scottish mountains.

Headline for Southeastern Highlands

Persistent upland gales. Rain and fog, particularly west of A9.

Detailed Forecast for Sunday, 4 October, 2026

How windy? (On the Munros)	Southwesterly, increasing markedly with height to 40 to sometimes 50mph on higher summits.
Effect of wind on you?	Significant wind chill and walking difficult. General mobility strenuous on higher summits.
How wet? (Precipitation and its impact)	Occasional drizzly rain, mainly W of A9. Rain; rarely ceasing from soon after dawn west of A9. Elsewhere, rain on and off, but only occasional drizzle Angus and Ochils.
Cloud on the hills?	Foggy across nearly all mountains all day Persistent low cloud soon forming across most mountains, typically above 450 to 650m, although most cloud above 700m near and east of Glenshee and Ochils.
Chance of cloud free Munros?	Less than 10% by late morning;
Sunshine? Air clarity (below cloud)	Perhaps pockets of sunshine lower slopes east of A9, most likely east from Glenshee and near Ochils. Very good visibility
How Cold? (at 900m)	10C. Will feel as cold as minus 5C directly in the wind.
Freezing Level	Above the summits.

All mountain areas of Britain from Monday, 5 October, 2026

Rain at some stage more or less daily on most mountain areas through the coming week. However, total rainfall small, and frequently dry E & S Wales and S Pennines. Frequently windy Scottish Highlands, whilst progressively southwards, periods of strong winds will less frequent. A brief period of colder less windy weather around the middle of next week brings snow showers to some northern mountains.
