General Summary for Tuesday, 3 November, 2026

British Mountain Summary:
Based on forecast chart for noon 3 November, 2026

Cloud drifts across most eastern mountains, more broken westwards; some highest summits in Scotland close to the top of a cloud sheet at times. Local spots of light rain. Light wind northern Scotland, easterly winds elsewhere, stronger over England & Wales. Sunniest toward all western coasts.

Headline for Southeastern Highlands

Cloud around many hills; mostly light wind.

Detailed Forecast for Tuesday, 3 November, 2026

How windy? (On the Munros)	Easterly 10-15mph, some gustier spots 20mph near the central belt.
Effect of wind on you?	**Mostly small.**
How wet? (Precipitation and its impact)	**Little or no rain** Some patchy drizzle occasionally on some east-facing hills toward the lowlands.
Cloud on the hills?	**Fairly extensive, high tops near top of cloud** Cloud banks drifting over high terrain, the base mostly above 700-800m, whilst the top of the cloud close to higher summits which may emerge between cloud banks at times. Breaks more often toward and west of Loch Tay.
Chance of cloud free Munros?	**30% (some tops above cloud)**
Sunshine? Air clarity (below cloud)	Occasional sun mostly central highlands. Visibility very good out of cloud; patchy fog in glens in morning.
How Cold? (at 900m)	3 to 5C, coolest if in cloud; little change with added height.
Freezing Level	Above the summits, but pockets of frost both higher and lower slopes at dawn.

Southeastern Highlands - Looking Ahead

	Wednesday 4 November	Thursday 5 November
How windy? (On the Munros)	Southeasterly 10 to 15mph, local gusts 20mph toward Callander area.	Easterly 15 to 25mph, perhaps some stronger gusty spots mainly summits nearer the central belt.
Effect of wind on you?	**Mostly small.**	**Starting to affect comfortable walking in exposure on some tops.**
How wet? (Precipitation and its impact)	**Largely dry** Odd spots of light rain around cloud, mainly toward the central belt, possibly Angus.	**Little or no rain** Odd spots in the wind around cloud banks, most likely on east-facing hills.
Cloud on the hills?	**Varying over hills, some low fog** Toward the central belt fog perhaps widely on low ground in morning. Banks of cloud drifting onto some hills, most persistent in more eastern areas, more broken west; some highest summits may be just above this cloud. May thin and break up a little during day.	**Fairly extensive** Cloud banks covering many mountains, base around 700m, whilst highest summits highest tops may be close to top of the cloud. Some breaks on slopes toward northwest around Lochs Tay & Rannoch.
Chance of cloud free Munros?	**40%**	**30%**
Sunshine? Air clarity (below cloud)	Patchy cloud and sun, best toward west. Visibility very good out of cloud, but some low terrain persistently foggy.	Patchy sun breaking through mainly toward and north of Loch Tay. Visibility very good out of cloud.
How Cold? (at 900m)	2 or 3C.	2C.
Freezing Level	Above the summits, but frost in morning in some glens and upland hollows.	Close to freezing point on highest tops; patchy frost early in day in sheltered spots both higher and lower slopes.

Planning Outlook

All mountain areas of Britain from Wednesday, 4 November, 2026

High pressure persists toward the north this week, maintaining quiet weather conditions. Easterly winds prevail, strongest during midweek over England & Wales, tending to lessen toward the weekend; wind often lighter and variable toward northern Scotland. Largely dry, local light showers or drizzle mostly in the east. Variable amounts of cloud covering hills, some higher Scottish tops emerging above an inversion at times. Sunnier and clearer near to western coasts. Generally just above freezing over the mountains, but local pockets of frost in shelter and in glens; toward the weekend, high Scottish tops dip just below freezing.
