## General Summary for Monday, 16 November, 2026

**British Mountain Summary:**
**Based on forecast chart for noon 16 November, 2026**

Cold northerly winds in the morning bring snow and hail showers to northern Scotland and locally north Wales, otherwise generally clear and sunny. Winds drop light all areas through middle of day, then strengthen southeasterly later, gales into night; rain and hill snow moves in from southwest.

**Headline for Southeastern Highlands**

Mostly dry, patchy cloud breaks to be widely sunny.

## Detailed Forecast for Monday, 16 November, 2026

| | |
|---|---|
| **How windy? (On the Munros)** | Northerly 20-35mph at dawn, easing from west to 10mph or less middle of day.<br>From dusk, rising southeasterly, gales into night, reaching 50-60mph from midnight. |
| **Effect of wind on you?** | **Marked wind chill at first particularly eastern mountains, becoming small for several hours.**<br>**Deteriorating after dark, significantly into night.** |
| **How wet?**<br>(Precipitation and its impact) | **Rare local showers fading**<br>Central areas substantially dry all day.<br>Isolated brief snow or hail showers, mostly east from Pitlochry to Angus in morning, but fading.<br>Onward well into night, snow develops from the south. |
| **Cloud on the hills?** | **Mostly very little**<br>Some patchy cloud around higher slopes in the morning, mostly areas east of the A9, but all likely to break up leaving most mountains clear middle of day onward.<br>Into night, cloud starting to lower onto tops. |
| **Chance of cloud free Munros?** | **70% rising above 90%** |
| **Sunshine?**<br>Air clarity (below cloud) | Generally sunny, some patchy cloud mostly east from Glenshee in morning.<br>Visibility excellent. |
| **How Cold? (at 900m)** | -2C.<br>Feeling like -10 to -15C directly in wind early morning, but improving. |
| **Freezing Level** | 600m, but also frost in sheltered central glens in the morning. |

**Southeastern Highlands - Looking Ahead**

| | Tuesday 17 November | Wednesday 18 November |
|---|---|---|
| **How windy? (On the Munros)** | Easterly 40 to 50mph, in places 60mph and very gusty around high mountains; tending to lessen a little with time. | Easterly 20 to 30mph. |
| **Effect of wind on you?** | **Difficult conditions, buffeting gusts to lower slopes and significant wind chill; some improvement toward central belt.** | **Starting to affect ease of walking over exposed terrain, some more buffeting gusts in places. Considerable wind chill.** |
| **How wet?** (Precipitation and its impact) | **Persistent hill snow likely**<br>Some uncertainty about extent of precipitation: Expect persistent snowfalls extensively over the mountains throughout the day, sleet or rain lower elevations; beware of blizzard conditions over tops. | **Snow flurries**<br>Light snow may fall frequently across the region; sleet or rain lower slopes. |
| **Cloud on the hills?** | **Extensive**<br>Shrouding the mountains widely from lower elevations upward much of the region most likely all day. | **Fairly extensive**<br>Shrouding most high terrain all day, some banks to lower levels in east. Local breaks may emerge toward central highlands, rarely above tops. |
| **Chance of cloud free Munros?** | **10%** | **20%** |
| **Sunshine?** Air clarity (below cloud) | Overcast and dull.<br>Visibility mostly poor, appalling if in snow and cloud on high terrain. | Little or no sun.<br>Visibility good where dry, but often reduced, very poor at times if in snow. |
| **How Cold? (at 900m)** | -1 or -2C, may lift to around 0C.<br>Feeling like -15C or possibly colder in exposure to stronger wind. | -1C.<br>Feeling near -10C in the wind. |
| **Freezing Level** | 500-700m, lowest if precipitation continues, but tending to rise a little into the afternoon. | 700-800m. |

## Planning Outlook

**All mountain areas of Britain from Tuesday, 17 November, 2026**

Scottish mountain tops stay below freezing throughout this week ahead, snowfalls on Tuesday most prolonged east and southern areas. Thereafter, the Highlands see mostly little precipitation this week, but snow and hail showers will feed in from the north at times, locally giving frequent snow to the far north and the north Cairngorms. Frost also common in the glens. For England & Wales, snow on Monday night turns to rain into Tuesday as the freezing level rises above the summits, then dropping back to freezing above 800m midweek with a mix of rain and upland snow.
A mixed outlook into the weekend and beyond, some quieter windows, but further areas of rain and hill snow are likely, perhaps milder air into late November.

**Forecast issued at 15:02 on Sunday, 15 November, 2026**
