General Summary for Thursday, 19 November, 2026

British Mountain Summary:
Based on forecast chart for noon 19 November, 2026

Chilly but fine for much of the Highlands, local snow showers moving inland from the Moray Firth. Brisk easterly winds for Scotland and northern England. Murky with rain over the Pennines, snow higher tops, drier for Lake District. Low cloud for east Wales, clearer west; showery in south Wales.

Headline for Southeastern Highlands

Largely dry, an odd snow flurry east, sunnier west; breezy.

Detailed Forecast for Thursday, 19 November, 2026

How windy? (On the Munros)	East-northeasterly 20 to 30mph, strongest on tops toward the central belt in the morning.
Effect of wind on you?	**Starting to affect ease of walking on some high terrain. Considerable wind chill.**
How wet? (Precipitation and its impact)	**Isolated snow showers east** Central highlands likely dry all day. Rare brief snow flurries mostly areas from Lochnagar to Angus glens.
Cloud on the hills?	**Mostly very little** Patchy cloud drifting onto some higher slopes mostly in eastern areas, whilst central tops are often clear.
Chance of cloud free Munros?	**80%**
Sunshine? Air clarity (below cloud)	Intermittent sun, more often sunnier west of the A9. Visibility very good.
How Cold? (at 900m)	-1 or -2C. Feeling like -10C directly in the wind.
Freezing Level	700m, rising marginally in middle of day. Frost in many glens in morning.

Southeastern Highlands - Looking Ahead

	Friday 20 November	Saturday 21 November
How windy? (On the Munros) **Effect of wind on you?**	Northeasterly then variable, 10-15mph or less, locally starting at 15-20mph some easternmost hills. **Mostly small.**	Variable direction below 10mph. Toward dusk rising east-southeasterly 15-20mph, perhaps stronger after dark. **Small most or all daylight.**
How wet? (Precipitation and its impact)	**Precipitation rare if any** Chance of an isolated brief snow flurry, mostly easternmost hills, but most places stay dry all day.	**No precipitation expected**
Cloud on the hills? **Chance of cloud free Munros?**	**Occasional patches, mostly east** Patches of cloud around some slopes, more likely in eastern areas in the morning, some may come and go into the afternoon, but many mountains likely often clear. **70%**	**None expected** **Above 90%**
Sunshine? Air clarity (below cloud)	Frequently sunny central highlands, some patchy cloud eastern areas. Visibility excellent.	Extensive sunshine and superb visibility. Patchy fog in some glens.
How Cold? (at 900m) **Freezing Level**	-1 or -2C. 700-800m, may rise slightly higher near the central lowlands. Frost widely in glens in the morning.	-2C. Much terrain frozen in morning, partial thawing sunlit slopes up to 600-700m.

Planning Outlook

All mountain areas of Britain from Friday, 20 November, 2026

Staying below freezing over Scottish mountains into the weekend and next week, varying around freezing for tops in northern England, at times milder for Wales. Frost common into valleys and glens. A few snow showers in northeastern Scotland on Friday, otherwise plenty of dry weather and sunshine into the weekend; patchy fog on some low ground. A risk of rain moving into Wales into Sunday, may fall as snow on hills. Light winds for most places on Saturday, then stronger east-southeasterlies on Sunday, which may bring cloud onto some eastern hills. Next week sees weather systems pushing in from the Atlantic with some strong winds, rain and hill snow in the outlook.
