General Summary for Saturday, 21 November, 2026

British Mountain Summary:
Based on forecast chart for noon 21 November, 2026

Fine, cold and light wind most areas. Bright sunshine widely but the ground frozen or partly frozen. Less cold with cloud coming and going Wales, and also cloudy for periods southern Scotland and Cumbria with chance of a little light precipitation.

Headline for Southeastern Highlands

Terrain nearly all frozen. Periods of sun, light wind.

Detailed Forecast for Saturday, 21 November, 2026

How windy? (On the Munros)	Variable direction below 10mph. In afternoon easterly 15mph, perhaps locally 20mph by dusk.
Effect of wind on you?	**Mostly negligible**
How wet? (Precipitation and its impact)	**No precipitation**
Cloud on the hills?	**Little if any** Chance pockets of fog on.a few higher slopes, most likely in corries.
Chance of cloud free Munros?	**Almost certain**
Sunshine? Air clarity (below cloud)	Extensive sunshine - some cloud by afternoon central highlands. Superb visibility.
How Cold? (at 900m)	-2C.
Freezing Level	Much terrain frozen in morning, partial thawing sunlit slopes up to 600-700m.

Southeastern Highlands - Looking Ahead

	Sunday 22 November	Monday 23 November
How windy? (On the Munros)	Easterly 20 to 30mph, locally very gusty, sometimes on lower slopes.	Southeasterly 20mph, perhaps 15mph Angus and Ochils.
Effect of wind on you?	**Marked wind chill and sometimes abruptly gusty winds will make balance difficult in places; sometimes on lower slopes.**	**Fairly small.**
How wet? (Precipitation and its impact)	**Precipitation very unlikely** Risk snow flurries, or very light rain lower slopes.	**Precipitation not expected**
Cloud on the hills?	**Little if any** Risk cloud forming on some higher areas - at this stage extent uncertain Cloud base 750-900m.	**May shroud many higher areas** Banks of cloud, base 700 to 900m, may be extensive.
Chance of cloud free Munros?	**50%**	**40%**
Sunshine? Air clarity (below cloud)	Bright sunshine intermittently, large banks of cloud will come and go. Visibility excellent.	Patchy sunshine and very good visibility.
How Cold? (at 900m)	-1C. Will feel as cold as minus 8C directly in the wind.	-1C Will feel as cold as minus 6C in the wind.
Freezing Level	850m. Terrain widely frozen lower slopes, particularly those out of the sun.	800m. Lower areas partly frozen after a frost sheltered valleys.

Planning Outlook

All mountain areas of Britain from Sunday, 22 November, 2026

Extensively dry and cold conditions will tend to be eroded away from the west only slowly early next week as high pressure to the east gives way only slowly. Rain, or on higher areas, particularly Scotland, snow, will occasionally make inroads into Wales on Sunday and Monday before the precipitation , together with strong winds progresses across the country. Further bands of precipitation will follow, together with areas of upland gale and low cloud. All in all temperature levels remaining below normal.

Forecast issued at 12:28 on Friday, 20 November, 2026
