## General Summary for Sunday, 19 May, 2024

### British Mountain Summary:

#### Based on forecast chart for noon 19 May, 2024

Early areas of low cloud and fog will burn away through the morning to leave most mountains clear of cloud with periods of warm sunshine, most extensive for southwestern Scotland, as well as England and Wales. Cloud banks may persist for northern Scotland where it will be cooler. Risk isolated inland showers.

#### Headline for Southern Uplands

Mostly fine and dry with broken cloud and sunshine. Some fog possible early in day.

## Detailed Forecast for Sunday, 19 May, 2024

<b>How windy? (On the summits)</b>	East to northeasterly, 5 to 15mph, may increase to 20mph Cheviots.
<b>Effect of wind on you?</b>	Mostly small
<b>How wet? (Precipitation and its impact)</b>	<b>Largely dry</b> Chance of an isolated afternoon shower mainly Galloway.
<b>Cloud on the hills?</b>	<b>Little most areas; risk fog east</b> Brief fragments soon clearing. Fog may extend inland from the east coast to cover lower eastern hills early and late in the day.
<b>Chance of cloud free summits?</b>	<b>80%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Broken cloud and sun. Visibility very good, but risk of fog near to North Sea coast.
<b>How Cold? (at 750m)</b>	8 to 11C, warmest western areas, may drop cooler easternmost hills later.
<b>Freezing Level</b>	Above the summits

**Southern Uplands - Looking Ahead**

	<b>Monday 20 May</b>	<b>Tuesday 21 May</b>
<b>How windy? (On the summits)</b>	Easterly or variable, 5 to 15mph.	Easterly or at times variable, 5 to 10mph, perhaps lifting to 15mph in the east later.
<b>Effect of wind on you?</b>	<b>Small</b>	<b>Small</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Rain unlikely</b> Chance of an isolated shower forming later afternoon over Galloway hills.	<b>Risk scattered heavy showers afternoon.</b> Dry all morning, then an increasing risk of some showers developing, perhaps some with some potent bursts, as an area of mid level cloud moves in from the east.
<b>Cloud on the hills?</b>	<b>Covering eastern hills for a time</b>  Banks of low cloud or fog in east, likely to thin back toward the North Sea coast. Rare if any patches in west.	<b>Clear for many hours, low cloud risk afternoon.</b>  Hills clear for many hours, but risk of low cloud edging in from the east coast in the afternoon to cover eastern areas. Western hills may stay clear.
<b>Chance of cloud free summits?</b>	<b>70% east, 90% west.</b>	<b>80%, may lower to 30% in east afternoon.</b>
<b>Sunshine?</b> Air clarity (below cloud)	Patchwork of cloud and sun. Visibility very good; possibly mistier eastern areas especially morning.	Sunny morning, tending to see skies fill in with cloud in the afternoon. Visibility generally good or very good, may become misty in the east.
<b>How Cold? (at 750m)</b>	6 to 8C Cheviots & Borders. 8 to 11C Dumfries & Galloway.	8C lifting to 11C
<b>Freezing Level</b>	Above the summits	Above the summits

**Planning Outlook**

**All mountain areas of Britain from Monday, 20 May, 2024**

Pressure stays fairly high early next week. Mostly dry and quite warm for many places, but feeling cooler toward the north and east for a few days as air circulates around from the north. Easterly breezes will remain most common. Low cloud eastern hills at times, western mountains more often clear. Localised showers forming in the afternoons. Risk of more widespread rain developing by midweek with lower pressure likely, but much uncertainty about the position of developing weather systems by this stage.

**Forecast issued at 13:02 on Saturday, 18 May, 2024**
