## Detailed Forecast for Thursday, 22 May, 2025

|   |  |
|---|--|
| <b>How windy? (On the summits)</b>                | Northeasterly 10-20mph. Becoming variable afternoon, 15mph or less. Stronger winds a dawn, up to 25mph east.   |
| <b>Effect of wind on you?</b>                     | <b>Mostly small, some comfortable walking affected in the morning, feeling chilly in east.</b>   |
| <b>How wet?</b><br>(Precipitation and its impact) | <b>Dry most places all day</b><br>Small chance early in day an odd spot of rain from high cloud, or isolated short-lived showers on easternmost hills. |
| <b>Cloud on the hills?</b>                        | <b>Mostly little if any</b><br>Patches over high terrain at dawn, greatest risk east of M74. Bases soon lift and disperse for cloud-free hills.        |
| <b>Chance of cloud free summits?</b>              | <b>Soon above 90%</b>  |
| <b>Sunshine?</b><br>Air clarity (below cloud)     | Little sun at dawn, cloud soon breaking for a patchwork of sun.<br>Excellent or superb visibility.   |
| <b>How Cold? (at 750m)</b>                        | 2 or 3C at dawn, coolest east. Rising towards 8C Galloway, but only 5C Cheviots. Feeling like -5C in breeze in east at first.                          |
| <b>Freezing Level</b>                             | Above the summits  |

**All mountain areas of Britain from Friday, 23 May, 2025**

A big change of weather pattern by the weekend as low pressure moves in from the Atlantic and southwesterly winds then prevail. By Friday evening-night, rain moves eastwards across all areas, amounts smaller toward the south Pennines and Wales. Blustery winds, low cloud, damp conditions for Saturday, then widely heavier rain is expected by Saturday night, accompanied by winds strengthening to gale force over many hills. Remaining very windy through Sunday and Monday with mountain gales; cooler too, with heavy showers, particularly frequent in western Scotland, a risk of hail and thunder. A changeable week ahead. some improvement likely later in the week.
