General Summary for Friday, 14 November, 2025

British Mountain Summary:

Based on forecast chart for noon 14 November, 2025

Cold across Scotland and northern England, below freezing on Scottish mountains all day. Snow flurries toward north/east Highlands. Significant chill factor from strengthening easterly winds, gale-force all day southern Scotland and northern England. Severe gales and incessant heavy rain Wales and Peak District.

Headline for Southern Uplands

Gales, local severe gusts. Showers or flurries mostly east.

Detailed Forecast for Friday, 14 November, 2025

How windy? (On the summits)	Easterly, strengthening 30 to 45mph, later in day 50mph higher areas, powerful gusts downslope west of high tops.
Effect of wind on you?	Increasingly difficult walking conditions over the hills, gusts knocking you off balance. Significant wind chill.
How wet? (Precipitation and its impact)	Snow flurries eastern tops Light showery rain on and off Lothians to Borders and Cheviots, falling as snow flurries above 500-600m. Largely dry west of the M74. Wet underfoot, some flooding after previous rain, a dusting of snow possible on highest summits.
Cloud on the hills?	Mostly eastern hills Covering eastern hills fairly persistently above 600m, locally lower in showers. Further west, cloud base higher and more broken above 700m.
Chance of cloud free summits?	30% east, 60% west.
Sunshine? Air clarity (below cloud)	Some weak sun mostly west, but a thick veil of high cloud likely. Visibility very good where dry, locally hazier toward east coast.
How Cold? (at 750m)	Around 0C. Wind chill feeling like -10 to -15C.
Freezing Level	700 to 800m.

All mountain areas of Britain from Saturday, 15 November, 2025

Colder air extends to all areas, staying below freezing over higher mountains most likely throughout the next week to 10 days. In the short-term, for Wales and south Pennines expect ongoing flooding from high rainfall on Friday, the rain eases into Saturday here. A lot of dry weather for Scotland this weekend, but some snow flurries move in from the north on Sunday. Areas of showery snow over the hills into next week coming in on often strong northerly winds, gale force into midweek. Snow most frequent toward north of the Highlands with some locally more substantial accumulations over higher terrain; some accumulating upland snow possible more widely during Tuesday as a front drifts southward.

Forecast issued at 15:01 on Thursday, 13 November, 2025
