General Summary for Monday, 20 July, 2026

British Mountain Summary:

Based on forecast chart for noon 20 July, 2026

Some patchy drizzle and low cloud covering many northern mountains in the Highlands in the morning. Cloud persists on hills toward northwest coasts, tending to lift and break further inland. Hills in England & Wales mostly clear. Wind fairly light overall. Very dry ground and high fire risk remains.

Headline for Southern Uplands

Light wind. Largely dry, varied cloud lifts.

Detailed Forecast for Monday, 20 July, 2026

How windy? (On the summits)	Northerly 5-15mph, some variability in speed and direction.
Effect of wind on you?	Mostly small.
How wet? (Precipitation and its impact)	Rain unlikely most or all day Chance of an odd spot of rain easternmost hills in the morning, otherwise dry.
Cloud on the hills?	Early fog patches lift above summits Patchy cloud banks from middle slopes up in the morning, at varied heights with clear slopes between layers (including tops). Drifting over high terrain for a few morning hours, but bases continuing to lift, clearing the summits by afternoon.
Chance of cloud free summits?	Rising to 90%
Sunshine? Air clarity (below cloud)	A patchwork of cloud and sun, high cloud may spread across the sky at times. Very good visibility.
How Cold? (at 750m)	11C rising to 16C well inland, staying a degree or two cooler near coasts.
Freezing Level	Above the summits.

All mountain areas of Britain from Tuesday, 21 July, 2026

Largely dry weather prevails as high pressure remains nearby to the west. A northwesterly flow keeps temperatures nearer to average for the time of year, dawn temperatures in the middle single digits in Scotland; staying warm in England and Wales but maximum summit temperatures only to the high teens. Cloud and drizzle affects northwest Scotland more often, occasionally drifting further south. Despite this, ground remains very dry with high fire risk, with ongoing wildfire management limiting access in places. A more unsettled trend develops during next weekend, bringing wind, rain and showers first to Scotland and increasingly widely. England and Wales remain quite warm.

Forecast issued at 16:00 on Sunday, 19 July, 2026
