General Summary for Monday, 2 November, 2026

British Mountain Summary:
Based on forecast chart for noon 2 November, 2026

Light winds for much of the Highlands; a stronger northeasterly breeze for England & Wales, particularly toward the south, feeling chilly. Generally dry, sunshine best in southern Scotland and toward the Irish Sea coast. Some cloud banks in northern Scotland, but high mountains may poke out above this.

Headline for Southern Uplands

Fairly light wind, sunniest western hills.

Detailed Forecast for Monday, 2 November, 2026

How windy? (On the summits)	Northeasterly 10 to 20mph, locally 25mph higher Cheviots.
Effect of wind on you?	**Mostly small, but more noticeable and feeling chilly on higher slopes in east.**
How wet? (Precipitation and its impact)	**Rain not expected**
Cloud on the hills?	**Mostly little, if any west** Some cloud may graze higher slopes around The Cheviot, but much cloud above hills. Some early patchy fog lower down.
Chance of cloud free summits?	**80% east, above 90% west.**
Sunshine? Air clarity (below cloud)	Patchwork of sun east, sunnier west. Visibility very good, some haze lower down or fog patches in morning.
How Cold? (at 750m)	3 to 5C. Feeling like -3C directly in wind on eastern tops.
Freezing Level	Above the summits, but patchy frost in valleys at first, also some sheltered higher slopes.

Southern Uplands - Looking Ahead

	Tuesday 3 November	Wednesday 4 November
How windy? (On the summits) **Effect of wind on you?**	East to northeasterly 15 to 25mph, some gusty areas around higher tops, particularly Cheviots. **Starting to affect ease of walking on some exposed higher terrain and some sudden gusts lower down locally. Feeling chilly.**	East to southeasterly 15 to 25mph, strongest toward the south and gusty in places. **Fairly small, but some gustier areas starting to affect ease of walking and feeling chilly in exposure.**
How wet? (Precipitation and its impact)	**Some drizzly rain** A little light rain or drizzle occasionally, mostly eastern hills. Further west, patchy or very little at all.	**Largely dry** Odd spots of drizzle around cloud in east.
Cloud on the hills? **Chance of cloud free summits?**	**Varied cloud banks, breaks west** Likely to cap some high terrain fairly extensively for a few hours, cloud base around 700m, locally lower east. Breaks may form increasingly, particularly western areas, but patches remain in east. **30% east, to 50% west.**	**Mostly eastern tops, clearer west** Banks of cloud likely to come and go above 700m, most often Cheviots. Well broken toward the west, more often clear toward Galloway. **50% east, 80% west.**
Sunshine? Air clarity (below cloud)	Fairly cloudy, some sun may break through at times, mainly in the west. Visibility very good out of cloud.	Sunshine most widely west, cloudier east. Visibility very good.
How Cold? (at 750m) **Freezing Level**	4 to 6C, coolest east. Feeling like -3C directly in the wind. Above the summits, but possible pockets of frost some western areas at dawn.	4C. Feeling below freezing directly in the wind. Above the summits, but frost in morning mainly western valleys.

Planning Outlook

All mountain areas of Britain from Tuesday, 3 November, 2026

A settled week ahead as high pressure resides toward the north. Easterly winds will prevail, strongest for Wales and the southern Pennines. Largely dry weather, whilst variable cloud will be drawn in from the North Sea, at times some light showers in eastern areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows; then cooler toward the weekend on tops. Quiet weather also likely as next weekend begins, perhaps further ahead, though a mixed Atlantic influence may return to Scotland.
