General Summary for Saturday, 29 November, 2025

British Mountain Summary:

Based on forecast chart for noon 29 November, 2025

Snow showers toward northern Scotland, but much of the Highlands will be dry - sunshine and cloud breaks best toward southwest; sub-zero on tops, chilly northerly breeze. England and Wales sees rain fairly widely, snow falling on higher tops; wind very variable, but risk gales developing.

Headline for West Highlands

Cold and breezy, but generally dry, broken cloud, some sun.

Detailed Forecast for Saturday, 29 November, 2025

How windy? (On the Munros)	Northerly, 15 to 25mph, up to 30mph at times on the islands, then also more often inland afternoon and into evening.
Effect of wind on you?	Be prepared for significant wind chill in exposure on higher terrain, feeling blustery, particularly over coastal mountains.
How wet? (Precipitation and its impact)	Generally dry day Rare if any brief snow flurries. Late evening into night, risk snow coming in from the north for a time, mainly affecting areas north/east of Ben Nevis.
Cloud on the hills?	Patches mainly confined to high tops Cloud cover variable across area, but tending to come and go across higher tops from Lochaber and down the west coast, mostly above 1000m. Often clearer Loch Lomond NP.
Chance of cloud free Munros?	60%, to 80% inland southern areas
Sunshine? Air clarity (below cloud)	Variable cloud and occasional sun. Visibility very good.
How Cold? (at 900m)	-1 or -2C. Feeling like -10C if exposed to wind.
Freezing Level	600 to 800m, lowest inland Lochaber. Also frost some inland glens in morning.

All mountain areas of Britain from Sunday, 30 November, 2025

After a lull on Sunday, areas of low pressure then circulating to the west and north will dominate the weather pattern into next week, bringing generally unsettled weather. Southwesterly air and briefly milder into Monday, with rain for most places at times, but prolonged heavier rain for England and Wales. Then typically cooler with showery conditions - higher mountains near or just below freezing point likely for the remainder of the week - some snow on tops, occasional hail. Wind speed likely to vary, some squally gusty spells, but also some lulls possible during the week ahead.
