General Summary for Friday, 26 December, 2025

British Mountain Summary:

Based on forecast chart for noon 26 December, 2025

Generally dry for all areas, sunshine over most Scottish mountains - tops warmer than glens above an inversion; patchy low-level fog or cloud banks some slopes. Easterly winds remain strong and gusty England and Wales, feeling bitterly cold in exposure despite plenty of sun.

Headline for West Highlands

Sunshine, patchy cloud and gustier toward south.

Detailed Forecast for Friday, 26 December, 2025

How windy? (On the Munros)	Easterly 10 to 20mph, occasionally 25mph in southern areas from Loch Lomond to Arran, gusty in places, tending to increase a little during daytime.
Effect of wind on you?	Fairly small in Lochaber, but feeling blustery and colder further south, some uncomfortable gusty spots.
How wet? (Precipitation and its impact)	Dry all day
Cloud on the hills?	Mostly clear west, patchy cloud inland some slopes Patchy fog mainly glens or lower slopes, but western mountains generally clear. Eastern Loch Lomond NP to Rannoch Moor, some cloud banks higher up, 600-900m, highest tops likely just above this cloud.
Chance of cloud free Munros?	80% (higher tops above cloud locally)
Sunshine? Air clarity (below cloud)	Bright sunshine and excellent visibility, particularly Lochaber and west coast; locally misty lower down, some cloud inland and south.
How Cold? (at 900m)	0 to 2C, small variation with height inland, some corries and glens stay colder, whilst highest tops up to 4 or 5C.
Freezing Level	Frost in many inland glens, all day out of sunlight; terrain at least partly frozen higher up, but air temperature above freezing on higher tops.

All mountain areas of Britain from Saturday, 27 December, 2025

Dry weather continues into the weekend as a strong area of high pressure resides near or north of Scotland. Inversion conditions Scottish mountains, high tops generally above freezing and above most patchy cloud, some frost and fog in glens. Gusty east-northeasterly wind increasing for Scotland by Saturday, easing again for Sunday. Strong and gusty winds prevail for England and Wales, often cloudy, a little light rain occasionally Pennines; some sun toward west. Next week generally sees lower temperatures on high terrain, sub-zero over most mountains through New Year. Small amounts of precipitation, occasional showers or snow flurries, winds north or northwesterly.

Forecast issued at 7:10 on Friday, 26 December, 2025

The production of the Scottish forecasts is fully funded by the Scottish Government through Mountaineering Scotland with the support of sportscotland. Forecasts are issued daily by 16:30 and are kept under review and amended as necessary.
