## General Summary for Friday, 27 November, 2020

### British Mountain Summary:

#### Based on forecast chart for noon 27 November, 2020

A little rain Scottish Highlands, and mainly near the west coast low cloud. Elsewhere, dry, but fog wise very varied conditions. Fog in many valleys thins only slowly - if at all. On the hills, cloud often covering higher tops near N Irish Sea, otherwise tops often cloud free.

#### Headline for Yorkshire Dales and North Pennines

Hardly any wind; fog, mostly lower slopes. Dry.

## Detailed Forecast for Friday, 27 November, 2020

<b>How windy? (On the summits)</b>	Direction varied, 10mph or less.
<b>Effect of wind on you?</b>	Negligible.
<b>How wet? (Precipitation and its impact)</b>	<b>Precipitation unlikely</b>
<b>Cloud on the hills?</b>	<b>Most summits cloud free</b> Areas of fog or very low cloud in and above many valleys, persisting all day in some places. Higher up, cloud base typically 500 to 750m, lowest above more western dales.
<b>Chance of cloud free summits?</b>	<b>60%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Sunshine for periods on higher areas, particularly above more eastern dales. Very varied visibility: murky or foggy many lower areas; very good or excellent visibility higher up.
<b>How Cold? (at 700m)</b>	1C.
<b>And in the valleys</b>	Widespread frost after dawn; will rise to between 3 and 6C middle of day or early afternoon.

## Yorkshire Dales and North Pennines - Looking Ahead

	Saturday 28 November	Sunday 29 November
<b>How windy? (On the summits)</b>	South to southeasterly, 5 to 15mph.	Direction varied 10mph.
<b>Effect of wind on you?</b>	<b>Small.</b>	<b>Negligible</b>
<b>How wet?</b> (Precipitation and its impact)	<b>A little light rain here and there</b> Pockets of light rain or drizzle, although substantially dry.	<b>Little or no rain.</b> Risk of a little light rain and drizzle most likely morning northern Pennines.
<b>Cloud on the hills?</b>	<b>Patchy fog</b>  Confidence in the detail low: Particularly in morning, fog/low cloud may be confined below about 400m with many fells above the cloud. The fog is likely to fill in on most or all higher areas, although gradually fog lower slopes is likely to thin out.	<b>Many higher areas cloud free</b>  A mix of fog and mist on lower slopes, most extensive morning. But either throughout daylight, or increasingly from the south, above 400 to perhaps 600m, the higher fells above the cloud.
<b>Chance of cloud free summits?</b>	<b>20%</b>	<b>30%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Little or no sunshine; generally hazy or murky.	Foggy, misty or murky lower slopes. Superb visibility probable higher slopes.
<b>How Cold? (at 700m)</b>	2C.	6C
<b>And in the valleys</b>	Frost extensive at dawn. Rising to 3 to 5C during day.	Slight frost some valleys after dawn; 6 to 9C early afternoon.

**Planning Outlook****All mountain areas of Britain from Saturday, 28 November, 2020**

Very much drier over the coming week, although weakening fronts will bring a little rain and pulses of strong winds, mainly to the NW Highlands. Elsewhere, winds light and although extensively dry, fog will be widespread in and above valleys whilst higher up many summits become cloud free.

Temperature wise, the odd brief incursion of sub-freezing air onto higher summits Scottish Highlands, but any sustained cold at least a week off. Frost in valleys mostly confined to England and particularly Wales.
