General Summary for Saturday, 6 August, 2022

British Mountain Summary:

Based on forecast chart for noon 6 August, 2022

A warm front passes eastwards across Scotland, bringing cloud, some rain or drizzle. The northwest stays damp, but areas toward central Scotland will become brighter. Thickening cloud over hills of northern England and a little drizzle. Dry and fairly sunny for Wales.

Headline for Yorkshire Dales and North Pennines

Breezy, quite cool. Cloud thickening, but mostly dry.

Detailed Forecast for Saturday, 6 August, 2022

How windy? (On the summits)	Westerly 15 to 20mph, sometimes 25mph on higher North Pennines, particularly later in the day, 30mph toward dusk.
Effect of wind on you?	Fairly small, but ease of walking impeded on exposed higher terrain. Feeling cool.
How wet? (Precipitation and its impact)	Rain not expected most areas Chance of a brief drizzly shower mainly afternoon or evening over North Pennines if cloud thickens.
Cloud on the hills?	Mostly above hills, lowering onto some tops afternoon. Cloud bases generally above the fells. Likely to lower occasionally afternoon into early evening with patches sometimes drifting across higher slopes, mainly tops in North Pennines.
Chance of cloud free summits?	90% dropping to 60% N Pennines.
Sunshine? Air clarity (below cloud)	A fair amount of high cloud with sunshine sometimes weak; clouding over from the northwest for a time into afternoon. Visibility very good, hazier later.
How Cold? (at 700m)	7C rising to 11C.
And in the valleys	Cool start, below 10C at dawn, locally as cold as 5C some valleys. Rising to 17 to 20C, warmest toward east.

Yorkshire Dales and North Pennines - Looking Ahead

	Sunday 7 August	Monday 8 August
How windy? (On the summits) Effect of wind on you?	Westerly, 15mph, but 20 or 25mph early morning, possibly stronger just around dawn, mainly North Pennines tops. Mostly fairly small, but may impede walking on highest fells early in the day, perhaps very blustery for a time.	West or southwesterly, 10 to 15mph, occasionally 20mph North Pennines, but often less southern Yorks Dales. Mostly small.
How wet? (Precipitation and its impact)	Rain not expected Rare if any brief drizzly showers in the morning.	No rain
Cloud on the hills?	All clearing Patches of cloud may cover some western slopes early morning, but soon drifting above the hills or generally dispersing.	Fells clear Rare fragments around some western slopes early morning, soon dispersing.
Chance of cloud free summits?	70% rising above 90%	Above 90%
Sunshine? Air clarity (below cloud)	Sunshine and fair-weather cloud, which may cover the sky for periods then thinning. Visibility very good.	Often sunny, a little fair-weather cloud building, plus thin high cloud spilling in from west later. Visibility excellent.
How Cold? (at 700m) And in the valleys	10C rising to 13C. Around 10C at dawn, rising to 19 to 22C by early afternoon, warmest eastern dales.	12C rising to 15C. Below 10C at dawn, rising to 20 to 23C, warmest eastern dales.

Planning Outlook

All mountain areas of Britain from Sunday, 7 August, 2022

Southwesterly winds continue to influence Scotland into next week. Rain or drizzle will be most frequent in the Northwest Highlands, where low cloud will often shroud coastal hills. Winds strengthening at times toward gale force on the tops. Further south and east across Scotland, it will be commonly dry with higher cloud bases, becoming warmer and more humid with time. High pressure extends across England and Wales, leading to a settled outlook for the week ahead here, generally dry with light winds, becoming increasingly warm or very warm, particularly in southern areas.
