

# Yorkshire Dales & North Pennines

The entire Yorkshire Dales National Park and North Pennines AONB, including the Three Peaks and Cross Fell, plus Howgills, also south to Forest of Bowland.

[A Day with MWIS - Rheged, Penrith - Saturday 9th March 2024](#)  
[Full day weather skills course - see \[mwis.org.uk/information/day-with-mwis\]\(http://mwis.org.uk/information/day-with-mwis\) for info and booking](#)

## General Summary for Tuesday, 13 February, 2024

### British Mountain Summary:

#### Based on forecast chart for noon 13 February, 2024

Scotland; Southwesterly gales continuing to drive in showers, these of snow above 600-800m. Showers will ease, along with the wind, from the south in the afternoon.

England and Wales: Varied cloud and some drizzle at first, giving way from southwest to persistent rain and widespread hill fog.

### Headline for Yorkshire Dales & North Pennines

Bright start, a few showers. Winds easing, but drizzly rain and hill fog moving in.

## Detailed Forecast for Tuesday, 13 February, 2024

<b>How windy? (On the summits)</b>	Southwesterly 25 to 35mph at first, likely easing southerly 15-20mph or less. Possibly increasing again by evening.
<b>Effect of wind on you?</b>	<b>Blustery with marked chill early in day, but easing to become fairly small.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>A few showers, then drizzly rain edging in during afternoon.</b> Risk of drizzly showers occasionally moving into western Yorks Dales from the southwest. Often dry eastern Dales and North Pennines. Light to occasionally moderate drizzly rain developing from south during afternoon.
<b>Cloud on the hills?</b>	<b>Becoming extensive</b> Banks of low cloud focused toward western hills south from Tebay at first, with good breaks to tops elsewhere. Towards and into the afternoon, cloud bases will widely lower onto the hills with extensive hill fog developing in rain.
<b>Chance of cloud free summits?</b>	<b>60% at first, lowering to 20% into afternoon.</b>
<b>Sunshine? Air clarity (below cloud)</b>	Patchy cloud and sun, best toward north & eastern Pennines. High cloud thickening. Visibility good.
<b>How Cold? (at 700m)</b>	+2C. Wind chill risk feeling like -10C in morning, easing with time.
<b>And in the valleys</b>	Near freezing some dales at first, rising to 5 or 6C.

	<b>Wednesday 14 February</b>	<b>Thursday 15 February</b>
<p><b>How windy? (On the summits)</b></p> <p><b>Effect of wind on you?</b></p>	<p>Low confidence of forecast details: Likely southwesterly, risk 30 to 40mph, chance of lower speeds.</p> <p><b>Expect blustery conditions and marked wind chill. Chance of more moderate conditions.</b></p>	<p>Southeasterly, may well veer southerly, in the range of 15 to 30mph, perhaps at times less where wind go variable.</p> <p><b>Be prepared for varying conditions, times of little wind, then periods where it will be blustery and gusty with marked chill.</b></p>
<p><b>How wet?</b> (Precipitation and its impact)</p>	<p><b>Rain and drizzle</b></p> <p>Rain and drizzle fairly widespread all day, most persistent and heaviest toward western Dales. Patchier north and east.</p>	<p><b>Wet much of the day</b></p> <p>Slow moving frontal zones will edge north, and bring wet conditions through much of the day with rain and drizzle, steady for several hours.</p>
<p><b>Cloud on the hills?</b></p>	<p><b>Likely extensive</b></p> <p>Blanket low cloud likely across the fells, lowest in western Yorks Dales. Higher bases northward and some breaks toward the northeast.</p>	<p><b>Extensive</b></p> <p>Be prepared for extensive low cloud that will shroud the hills throughout much of the day, if not all, with any breaks rather fleeting.</p>
<p><b>Chance of cloud free summits?</b></p>	<p><b>20%</b></p>	<p><b>20%</b></p>
<p><b>Sunshine?</b> Air clarity (below cloud)</p>	<p>Overcast and dull. Likely murky, especially western Dales.</p>	<p>Overcast.</p> <p>Visibility increasingly poor or very poor in the rain and drizzle.</p>
<p><b>How Cold? (at 700m)</b></p> <p><b>And in the valleys</b></p>	<p>3 to 5C. Feeling like -5C or below if exposed to stronger winds.</p> <p>4 to 7C.</p>	<p>Lifting to 7C</p> <p>9 to 11C in the valleys</p>

**Planning Outlook**

**All mountain areas of Britain from Wednesday, 14 February, 2024**

A mixed week ahead as areas of low pressure rotate in from the southwest bringing spells of rain of hill snow and sometimes showers. Least precipitation typically for the Cairngorms. Higher pressure to the north of Scotland by midweek may then become more extensive for a time by next weekend, allowing some drier conditions. Wind speed and direction very variable, often west or southwesterly, but easterly for time during midweek for Scotland; lulls mixed with spells up to gale force on higher areas. Scottish mountains generally staying sub-zero, maintaining snow coverage widely here during the week ahead. High tops in England & Wales lifting above freezing point by midweek for a time.

**Forecast issued at 16:00 on Monday, 12 February, 2024**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
