## General Summary for Thursday, 12 September, 2024

### British Mountain Summary:

#### Based on forecast chart for noon 12 September, 2024

Very cold for September; hail and snow in showers across the mountains in Scotland, and hail and sleet highest tops Snowdon range (where precipitation frequent). Elsewhere, a few brief showers and frequent bright sunshine. Nevertheless, feeling well below freezing point across the mountains directly in the wind.

#### Headline for Yorkshire Dales & North Pennines

Risk of a brief shower.. Feeling very cold in the wind.

## Detailed Forecast for Thursday, 12 September, 2024

<b>How windy? (On the summits)</b>	Northwesterly, 20mph. perhaps 25mph higher slopes morning Overall will drop slowly through the day.
<b>Effect of wind on you?</b>	<b>Fairly small, but marked wind chill</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Little or no rain</b> In afternoon one or two brief showers - may give a flurry of hail on higher slopes.
<b>Cloud on the hills?</b>	<b>Little if any by mid morning</b> Cloud may cover some higher slopes after dawn, but hills cloud free within a few hours.
<b>Chance of cloud free summits?</b>	<b>Almost certain by late morning</b>
<b>Sunshine?</b> Air clarity (below cloud)	Bright sunshine; most extensive morning. Excellent visibility,
<b>How Cold? (at 700m)</b>	2 rising to 6C. Directly in the wind will feel well below freezing point.
<b>And in the valleys</b>	Slight frost some valleys at dawn; will rise to 13 to 15C in afternoon.

## Yorkshire Dales &amp; North Pennines - Looking Ahead

	Friday 13 September	Saturday 14 September
<b>How windy? (On the summits)</b>	West backing southwesterly, 10mph. Strengthening in the evening.	Southwesterly typically 35mph higher northern Pennines. Elsewhere, 25 to 30mph, strongest higher tops.
<b>Effect of wind on you?</b>	<b>Mostly negligible</b>	<b>Walking widely arduous - balance may be difficult on some higher areas. Considerable wind chill.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Little or no rain</b> Extensively dry although risk of a brief shower. Patches of rain may arrive toward dusk.	<b>Drizzly, mainly western dale Yorkshire</b> Drizzly rain on and off western dales south of Tebay. Perhaps a 'feel' of drizzle from time to time elsewhere.
<b>Cloud on the hills?</b>	<b>Very little</b>  Cloud covering some higher slopes after dawn will lift above the summits by late morning.	<b>Very extensive, particularly western dales in Yorkshire.</b>  Generally, fog from lower slopes up western dales south of Tebay. Cloud base a little higher elsewhere, typically between 500 and occasionally 750m.
<b>Chance of cloud free summits?</b>	<b>90%</b>	<b>30%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Sunny periods, before later sun weakening through higher cloud. Excellent visibility.	A little sun may come through mainly lower slopes, and more widely easternmost areas. Visibility mostly good, but misty in drizzle.
<b>How Cold? (at 700m)</b>	4C rising to 6 to 9C, warmest eastern summits and N Pennines.	9C. Will feel near freezing point directly in the wind.
<b>And in the valleys</b>	Frost at dawn in some valleys. Will reach 14 to 16C in afternoon (coldest western Yorkshire dales).	15 to locally 17C.

**Planning Outlook****All mountain areas of Britain from Friday, 13 September, 2024**

Turning warmer from the weekend. Very little rain for a week to ten days (perhaps longer) for England and Wales, but in Scotland, particularly western mountains, rain (mainly Saturday and Monday - although the precise timing uncertain), Around Tuesday the fine warm water will extend across Scotland.
