## General Summary for Tuesday, 10 June, 2025

### British Mountain Summary:

#### Based on forecast chart for noon 10 June, 2025

A fine day developing as overnight rain fades and cloud banks lift and break to reveal patchy sunshine. Early strong breezes easing gradually. Patchy cloud may come and go on higher western tops in the Highlands. Slower to improve in south Wales.

### Headline for Yorkshire Dales & North Pennines

Windy early in day, easing. Cloud soon lifting from hills.

## Detailed Forecast for Tuesday, 10 June, 2025

<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	Westerly 35-40mph around and before dawn. Dropping to 25mph during early morning, gradually easing to 15-20mph afternoon, or less later; turning southwesterly evening into night.  <b>Considerable buffeting early morning will challenge stability on exposed tops - feeling chilly, but improving, becoming fairly small later afternoon.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Damp at first, soon dry</b> Remnants of overnight rain gives patches of drizzle at first, but soon fading to leave a dry day.
<b>Cloud on the hills?</b>  <b>Chance of cloud free summits?</b>	<b>Early cloud banks largely clearing</b> Covering high fells with variable patches lower down in west at dawn. Generally lifting and breaking for often clear tops; patches may come and go on Three Peaks during morning.  <b>90% by mid-late morning</b>
<b>Sunshine?</b> Air clarity (below cloud)	Glimpses of sun emerging through morning, improving sun and well-broken cloud. Visibility increasingly excellent.
<b>How Cold? (at 700m)</b>  <b>And in the valleys</b>	7C at dawn, rising to 10C, up to 12C eastern areas afternoon. Little change, or slight rise further after dark.  8C at dawn, rising to 15C west, 17C eastern dales afternoon.

## Yorkshire Dales &amp; North Pennines - Looking Ahead

	Wednesday 11 June	Thursday 12 June
<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	Southerly 15-20mph. Shifting southeasterly 20-25mph through afternoon, becoming notably gusty into evening and reaching lower slopes.  <b>Fairly small. Some gusts, notably into evening and reaching lower slopes.</b>	Southeasterly 25 to 40mph, speeds may vary during day, gusts 50mph for a time, in places toward some lower elevations.  <b>Very blustery, walking arduous on high terrain, affecting balance on exposed tops, sudden buffeting gusts.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>No rain expected</b>	<b>Thundery rain likely developing</b>  Risk of occasional bursts of rain from elevated cloud layers, but several hours at least may well remain dry. Increasing threat with time of more widespread heavy rain developing from the south, risk thunderstorms.
<b>Cloud on the hills?</b>	<b>Early patches lift, clearing tops</b>  Patches of cloud drifting around most heights at dawn, may briefly fill in over high terrain. Lifting largely off fell tops through morning, chance of passing caps on southern and western Dales.	<b>Very little, then lowering in rain</b>  Most or all cloud above the hills for several hours at least. As rain develops, banks of cloud filling in across the hills, in places to some lower slopes.
<b>Chance of cloud free summits?</b>	<b>Becoming 90%</b>	<b>70%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Patchy sun gradually becomes more frequent. Visibility becoming excellent.	Weak sun and high cloud layers, becoming mainly overcast. Hazy, becoming poor visibility in rain.
<b>How Cold? (at 700m)</b>  <b>And in the valleys</b>	11C rising to 16C.  6C at sunrise, rapidly rising in the early hours of the morning. Reaching highs of 20 to 22C later afternoon.	12C, rising to 15C afternoon.  12C at dawn, rising to 20C; feeling humid; dropping a few degrees in rain.

## Planning Outlook

## All mountain areas of Britain from Wednesday, 11 June, 2025

Much warmer and feeling humid as winds shift southerly through Wednesday. Low pressure to the west and a front pushing in brings a risk of thunderstorms on Thursday, soonest in Wales, advancing northeastwards over England and Scotland likely afternoon into evening - some uncertainty of timing. Low pressure is likely to linger later week into weekend - initially staying warm and humid, bringing an ongoing risk of thundery downpours, mixed with sunnier spells. Likely cooler and windier with time over the weekend. Southwesterlies then prevailing with rain at times, most over western mountains into early next week, but a trend toward higher pressure building from the south with drier conditions emerging.

## Forecast issued at 16:30 on Monday, 9 June, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
